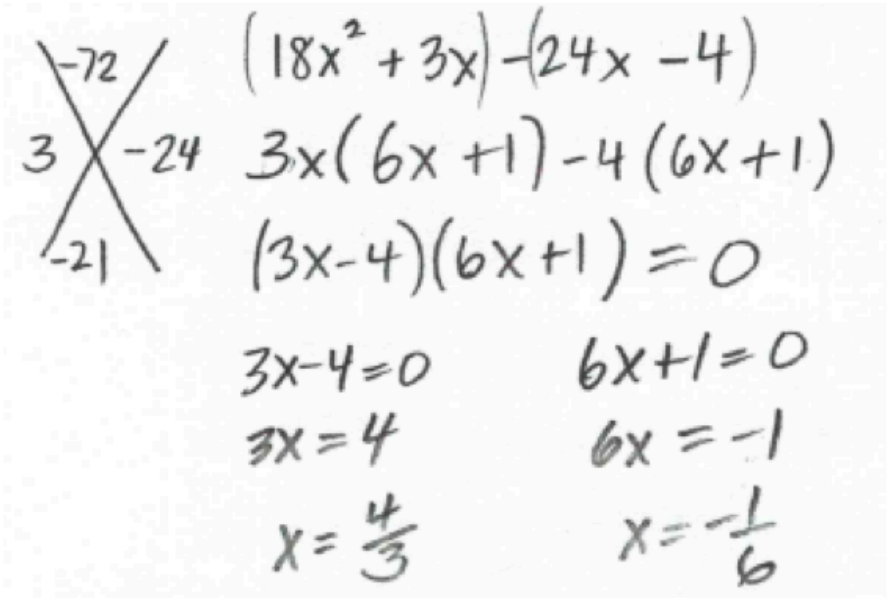
# Grading Activity, Fall 2017

## Miramar Mathematics Dept

Grade each student solution out of **10 points**.
The problem is typed. The course that this problem was given in is italicized. The student's work is hand written. The correct answer is typed in the box to the lower right for your reference.

---

1. Factor completely: $18x^2 - 21x - 4$ *(given in Math 46)*



Answer: $(6x+1)(3x-4)$

Activity created by Jenny VandenEynden, Professor at Grossmont College, San Diego
