---

## **ABYC Marine Law Symposium**

January 7, 2020

*Fire, Explosions, and Other Thermal Events* is a premier training event where expert panelists will analyze critical investigations and case studies that are impacting today's verdicts. There will be discussions on analysis tools, expert selection strategies, and essential investigation resources that can be the difference between winning and losing.

# TESTIMONIALS

"As an attorney whose primary emphasis is in recreational marine business, attending the Marine Law Symposium for the past 2 years has been extremely rewarding. The combination of speakers from fields such as law enforcement, general industry personnel, insurance, and legal creates a diversified learning experience such that anyone in the industry can benefit from the Symposium. For me, it has been an opportunity to interact with people in our industry and to gain knowledge from premier players in the recreational marine world. I always come away from the Symposium having gained invaluable information and a wealth of resources."

- Christina Paul, K&L Gates

"I really enjoyed the symposium. It was well put together, and the topics were timely and of interest to those in attendance. Whether you are a surveyor, expert, insurance broker, insurance company, or lawyer, the case studies and topics touched on areas of interest for all. It was fun to connect with the audience and their specific interests in the details of our case."

- Raul J. Chacon Jr., MG+M Law
