

State Committees

August 1, 2026 – July 31, 2027

Committees are essential to the mission and vision of ACEC New York. The work of these committees affects all aspects of the engineering profession, from legislative advocacy to environmental issues.

Committees offer more than a significant opportunity to impact the professional environment:

- *Committee work is often highly educational and interactive.*
- *Members share information that can improve their business practices and help make their firms more profitable and successful, and their efforts support the industry as a whole.*
- *Committee involvement is a great way to build connections with people throughout the organization and the entire industry.*

As you can see on the following pages, there is an ACEC New York committee for virtually every interest, and each one is important to the organization and the industry. If you are interested in serving on a committee, please sign up through your firm when participation forms are issued to the main contact at each member firm in the Spring.

NOTE: *To search within the PDF, press CTRL + F to open a search bar and enter firm name.*

OPEN COMMITTEES – *members can join at any time provided they contact ACEC New York Staff.*

CLOSED COMMITTEES – *membership based on nominations from firms each May.*
