# LETTER FROM THE COMMITTEE

Welcome to ACEC New York's 56th Annual Engineering Excellence Awards, the "Academy Awards" of engineering.

EEA project entries are viewed annually by a distinguished panel of judges based on uniqueness and originality, technical value to the engineering profession, social and economic considerations, and success in meeting client goals.

In 2023, we honor 86 outstanding achievements, exemplifying the creativity, effort and commitment that went into overcoming engineering obstacles.

Congratulations to the award-winning teams and clients who have earned the admiration of everyone in attendance tonight. Your skill and devotion deserve the highest praise.

Thomas Cascino, P.E., Co-Chair  
*Engineering Excellence Committee*

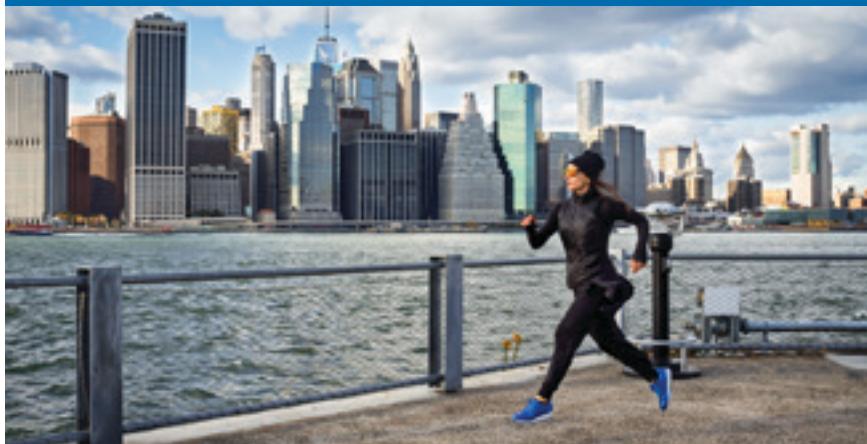

Luke Martinek, P.E., Co-Chair  
*Engineering Excellence Committee*

## We make the world smarter, more connected and more sustainable.

At Jacobs, we work every day to make the world better for all. Addressing critical infrastructure needs is among the most rewarding work we do, because it makes such a positive difference in the communities and companies we serve, helping to resolve major issues like mobility, urbanization, and security with smart and sustainable solutions.

**We're pushing the limits of what's possible.**

**Congratulations to all of this year's Engineering Excellence Award Winners.**

For Over 30 Years

BEFORE

AFTER

## ENHANCEMENT OF FOCH BOULEVARD INFRASTRUCTURE, DRAINAGE, & SAFETY IMPROVEMENTS

WORK IN PROGRESS

AFTER

KS Engineers, P.C. provided construction supervision and engineering design services for this project. The work included enhancing the infrastructure, drainage, and safety elements in the project area. The project was divided into two distinct locations: Foch Boulevard and Ilion Avenue. The infrastructure was significantly improved to prevent flooding by replacing a deficient combined sewer with new sanitary sewers and a new storm sewer. The project also featured innovative work utilizing right-of-way green infrastructure practices, including designing and installing porous pavement slabs. This minimizes flooding and benefits the environment by reducing the stormwater flow entering the storm sewers and reducing the amounts of contaminants eventually discharged into the Jamaica Bay. The project also included ADA-compliant pedestrian ramps, improved aesthetics, and improved air quality after nearly 100 trees were planted in newly built medians and sidewalks. The replacement of aging and deficient facilities provides the area with reliable infrastructure for the long term.

# 2023 BEST PANEL AWARD

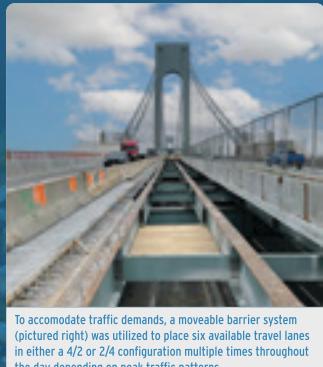

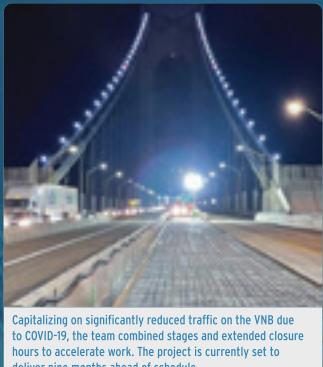

**HNTB NEW YORK ENGINEERING AND ARCHITECTURE, P.C./  
WSP USA CORP  
JOINT VENTURE**

The Best Panel Award is given to the firm that best communicates engineering excellence through the creation of a panel that is visually exciting and eye-catching, as well as promoting the achievements of the engineering profession.

## Smarter Construction for a Safer & Faster Connection

VN-84AX BROOKLYN TO STATEN ISLAND, NY

With ample experience, diligent planning and decisive action, the deck replacements of the Verrazzano-Narrows Bridge (VNB) were executed with the least possible impacts to the traveling public. The reconstructed approaches provide a safer, more modern link across the Narrows.

**Project:** VN-84AX Reconstruction and Rehabilitation of the Upper Level Approach at the Verrazzano-Narrows Bridge

**Client:** Triborough Bridge and Tunnel Authority, New York, NY

**Entrant:** HNTB New York Engineering and Architecture, P.C., and WSP USA Corp (Joint Venture), New York, NY
