2019 ACEC New York Engineering Excellence Awards

Black-Tie Gala
Saturday, April 13, 2019
NYC Hilton Midtown Ballroom
Congratulations to our partners and clients on a job well done. We are honored to be recognized by ACEC New York and salute all of this year’s award recipients.

aecom.com

Bridging the gap between idea + achievement

Through smart infrastructure and high-performance buildings, we’re helping our clients push open the doors to what’s possible, every day.

EMPIRE AWARD

The Empire Award honors the top-ranked project in the Engineering Excellence Program that was designed and built in New York State.

2010: C&S Engineers, Inc. for Midler City Industrial Park Brownfield Remediation

2011: HDR for Woodbury Toll Barrier Highway Speed E-Z Pass

2012: WSP Cantor Seinuk for World Trade Center Memorial and Museum

2013: Hazen and Sawyer, P.C. | CH2M Hill New York for R&D of Nitrogen Removal for NYCDEP

2014: Weidlinger Associates, Inc. for Brooklyn Botanic Garden Visitor Center

2015: Jaros, Baum & Bolles for One World Trade Center

2016: WSP Parsons Brinckerhoff for No. 7 Line Subway Extension

2017: Downtown Design Partnership (STV/AECOM joint venture) in association with Parsons Transportation Group and Santiago Calatrava for The World Trade Center Transportation Hub

2018: AECOM and Arup, a Joint Venture for 2nd Avenue Subway - Phase 1

Second Avenue Subway-Phase 1
New York, New York

The first major expansion of New York City's subway system in over 50 years, the first phase of Second Avenue Subway runs 1.8 miles between 63rd and 96th streets. It consists of three new stations at 96th, 86th and 72nd streets, plus one upgraded station at 63rd Street. From tunnel to track, the joint venture firms provided full engineering and architectural services.

Opened to passengers on January 1, 2017, the new subway line increases accessibility on Manhattan's Upper East Side by providing residents with a one-seat ride to destinations throughout the city. Average weekday ridership has continually increased, reaching 176,000 passengers in just the first five months. Congestion on the nearby Lexington Avenue line has decreased by 26 percent overall and 40 percent during peak morning hours. Taxi rides in the adjacent area have decreased by 20 percent, reducing greenhouse gas emissions.

Project Highlights

• The tunnel was New York City's first not to use rebar in the final liner. Steel fibers were used for flexural strength and to control cracking. Polypropylene fibers were used to control explosive spalling.

• Sound Lab technology was used to assess ways to reduce noises. Solutions included joint-free running rails with concrete tie encased in rubber and ceilings lined with perforated metal panels backed with sound-absorbing fiberglass.

• New standards were adapted and new guidelines developed for this project's stations. Design enhancements included high ceilings, column-free spaces and original art installations.

NOT JUST TRAFFIC.

CIVIL ENGINEERING • ENVIRONMENTAL REVIEW • URBAN PLANNING • AIR QUALITY + NOISE • SITE + UTILITIES ENGINEERING • TRANSIT • CEQR/SEQRA • RAIL SERVICES • PEDESTRIAN SAFETY • PERMITTING • COMMUNITY ENGAGEMENT • CAMPUS PLANNING • TRAFFIC ENGINEERING • CITY STRATEGIES • PARKING • TDM • FARE COLLECTIONS • TRANSPORTATION PLANNING • MASTER PLANNING • NEW MOBILITY

DINNER

Congratulations to all the recipients
of the 2019 ACEC New York
Excellence Awards

We Are Proud Sponsors of the 2019 ACEC New York Engineering Excellence Awards
Welcome to ACEC New York’s 52nd Annual Engineering Excellence Awards, the “Academy Awards” of engineering.

EEA project entries are viewed annually by a distinguished panel of judges on the basis of uniqueness and originality, technical value to the engineering profession, social and economic considerations, and success in meeting client goals.

In 2019, we recognize 130 exceptional projects, top examples of engineering challenges that were overcome with ingenuity, hard work and dedication.

ACEC New York is proud to honor the engineers that make life in New York and across the world possible.

Proud sponsor of ACEC New York. Congratulations to all award recipients.

Arup is the creative force at the heart of many of the world’s most prominent projects. From 89 offices in 34 countries, our 14,000 planners, designers, engineers, and consultants deliver innovative projects across the world with creativity and passion.

Congratulations to the ACEC New York 2019 award recipients who continue to inspire us with their ingenuity, creativity & commitment to sustainability.
We are honored to co-chair the 2019 Engineering Excellence Awards Committee and to recognize the past year’s achievements of the New York engineering community. These awards reflect our best projects across a wide range of engineering disciplines, all of which reaffirm the importance of our industry and our commitment to resiliency, sustainability and design excellence in the built environment. Together we extend our heartiest congratulations to tonight’s award-winning firms, owners and clients.”

H&H proudly supports the American Council of Engineering Companies of New York. Congratulations to all of this year's awardees.
Throughout its history, ACEC has asserted the relationship between a better built environment and a better world, and the ACEC New York Engineering Excellence Awards recognize our fellow members who have significantly—and remarkably—fostered that relationship. The firms, clients, architects and contractors whose unique talents came together to bring us to this proud moment deserve our warmest congratulations, our profound respect, and deep appreciation. They bring honor to the organization—and to all of us who share its values.”

Looking beyond traditional approaches to solve the water challenges ahead.

Utilities that build an Innovation Engine and incorporate innovation into their services, processes, technologies and financial and business models, are more likely to realize sustainability dividends in the areas of water resiliency, efficiency and quality.

2019 BEST PANEL AWARD

WENDEL WD ARCHITECTURE, ENGINEERING, SURVEYING AND LANDSCAPE ARCHITECTURE, P.C.

The Best Panel Award is given to the firm that best communicates engineering excellence through the creation of a panel that is visually exciting and eye-catching, as well as promoting the achievements of the engineering profession.

BRIDGING THE GAP
ENVIRONMENTAL PROTECTION MEETS A STATE-OF-THE-ART TRANSIT FACILITY

An aging, inadequate and poorly located bus maintenance facility desperately needed rehabilitation, but was struggling to find a new home. At the same time, a former brownfield site and Resource Protected Area was in a state of decay that was unfitting the environment. What seemed like two separate problems converged into a single solution. The result is a brand new, efficient and green-friendly maintenance facility that sits on a completely revitalized site.

Leng Branch Creek, spanned by a newly constructed bridge and cleaned up by a state-of-the-art filtration system, is no longer an opponent to the community, but a booster to the environment. The new facility, adapted through a Public-Private Partnership, is better located to serve the transit agency’s riders, and saves money through its innovations in efficiency.
