## **ACEC New York Awards Scholarships to 34 New York Engineering Students**

**NEW YORK, June 9, 2025** – Thirty-four engineering students attending colleges and universities in New York State have received \$106,500 collectively in scholarships from member firms and regions of the American Council of Engineering Companies of New York (ACEC New York). Individual awards range from \$500 to \$10,000 and are given based on the students' cumulative grade-point average, college activities, work experience and essays. For the fifth year, ACEC New York pledged \$3,000 to support National Society of Black Engineers (NSBE) scholarship students. Three students have each been awarded \$1,000 scholarships. For the second year, ACEC New York has awarded \$6,000 in scholarships to six community college students. These scholarships reflect our commitment to supporting the next generation of engineers from all walks of life. By helping to ease the financial burden of higher education, our members enable students to fully pursue their passion for engineering while building connections that can lead to valuable mentoring, internships, and career opportunities.

Since the program's launch in 2002, ACEC New York has awarded over 470 scholarships and other donations totaling more than 1.4 million dollars. The scholarship program was implemented to support up-and-coming engineers, thereby guaranteeing a strong future for the profession in New York State. We congratulate the Scholarship Committee for another successful year and sincerely thank the ACEC New York scholarship donors for their generosity.

ACEC New York continues to partner with the ACE Mentor Program of Greater NY, which pairs high school students with mentoring teams composed of industry professionals (many of whom work for member firms) to introduce them to careers in the design and construction industry. ACEC New York has awarded a \$3,000 scholarship to a high school student in the ACE Mentor Program, Nikkol Chen of Stuyvesant High School, who will be pursuing an education in Civil Engineering.
