

04/07/2020

COVID-19 has created unprecedented demand for nurses, allied health professionals, physicians, and non-clinical healthcare workers throughout the country. Various government agencies may play a critical role in managing the logistics of mobilizing clinical professionals on short notice, throughout the state, and in a manner that proactively and strategically addresses needs as the pandemic spreads. Medical Solutions respectfully desires to partner with the appropriate governing body or bodies of California to address this resource, logistics and staffing challenge on a statewide basis at scale and on time without sacrificing quality of care.

Medical Solutions is one of the largest healthcare staffing firms in the United States with a robust nationwide network of healthcare professionals serving over 2,700 medical institutions. Since 2001, Medical Solutions has provided comprehensive healthcare staffing services for hospitals, clinics, and medical facilities. We serve some of the nation's largest and most respected healthcare systems as their exclusive complete clinical staffing management solution. These healthcare systems trust Medical Solutions to place the industry's top clinical talent in nearly every conceivable clinical modality. Medical Solutions is perfectly suited and fully capable of standing shoulder-to-shoulder with the Nevada Department of Health and Human Services to deliver the right clinical professional on time, every time.

Our team offers a wide range of dynamic staffing solutions aimed to address hospitals' specific and ever-changing needs. We operate Nurse Bridge, a crisis staffing solution, as well as managed service programs that offer hospitals and healthcare systems a turnkey, single-source solution to contingent workforce management (our client's deal only with their program management team, who manages dozens of other staffing firms that operate as subvendors under our MSP program). We can also quickly deploy healthcare professionals through our EXCELrated staff program because we know when you need clinicians, you need them now.

We are committed to attracting and placing the highest quality healthcare professionals for our clients, led by our internal team of experienced healthcare professionals. Our clinical placement team utilizes a rigorous screening process to ensure potential clinicians are well-qualified for our client's open positions. Our people-first approach means our clients have access to our hands-on management style as well as 24/7 technological support.

With our recruiting expertise, innovative technology and commitment to clinical quality, Medical Solutions will be an excellent partner to the State of California and its hospital partners who are confronting a completely unique and fluid clinical staffing challenge. We invite you to learn more about us in the attached PowerPoint and welcome the opportunity to discuss a partnership in the near term.

Respectfully,

Mike Daeges
