ACRO ACCREDITATION
The Standard of Excellence

Why is ACRO the BEST OPTION for Radiation Oncology Accreditation?

We believe that accreditation should be a BENEFIT, not a burden for Radiation Oncology practices, and our mission is to partner with you to achieve exceptional quality and excellence in cancer care for your patients. 100% Radiation Oncology focused, ACRO Accreditation is:

Transparent and Fair:

- We define all review criteria at the outset – no surprises!
- Medical chart reviews are performed by multiple disease site specialists, and reviewed by expert disease site team leaders.

Comprehensive:

- Comprehensive medical, physics, and administrative review.
- We are the only program with a dedicated, complete Administrative Review performed by an administrative surveyor.

Educational:

- We help practices improve quality by providing detailed feedback and comments on all medical chart reviews.
- Our tiered feedback system provides detailed explanations of required corrective actions as well as additional recommendations and comments to help practices achieve robust quality processes.
- Accreditation Leadership and staff are available to answer questions at any time during the survey process.
- Our post-evaluation consultation is free of charge and offers practices the opportunity to ask questions about survey findings.

Innovative:

- We developed our unique 100% online chart review application in close partnership with Equal-Estro, a leading technology provider specializing in clinical trial applications. Our close partnership allows us to quickly review and improve our review system in response to customer feedback.
- ACRO Accreditation was an early adopter of virtual accreditation. Launched as a response to the COVID-19 pandemic, our virtual accreditation proved to be extremely popular among our practices and offers convenience without sacrificing our high standards.

Certified:

- The ACRO Accreditation program has itself been accredited by ISO 9001 since 2014. ISO 9001 is a highly regarded international accrediting body which evaluates an organization's processes and procedures. We undergo a comprehensive yearly review of our quality program, operations, and structure. This annual survey is invaluable and ensures that we maintain high quality procedures and incorporate the very latest concepts and tools into our quality management processes.

Valuable Add-on Options:

- In partnership with the Radiosurgery Society (RSS), we offer a Special Distinction in Stereotactic Radiotherapy, the only evaluation of its kind currently offered by an accrediting body.
- We are proud to offer an optional Billing and Coding Audit, made possible through our partner, Revenue Cycle/Coding Strategies.

American College of Radiation Oncology
319 South Glen Arven Avenue, Temple Terrace, FL 33617 | 206-956-3642 | www.acro.org

Financially Competitive and Flexible:

- ACRO Accreditation offers excellent value and flexibility, with lowest pricing and the choice of a three- or four-year accreditation term to fit the needs of your practice.
- When onsite travel takes place, it is always included as part of the initial application fee.
