

Noyes Bio for ACRO Board 2026

I would like to submit my name for consideration for the open position on the ACRO Board. I own and practice in a freestanding community cancer center and have been deeply committed to serving ACRO's membership for more than a decade. My service includes nearly ten years as ACRO Secretary–Treasurer (2016–2025), Vice Chair of the ACRO Government Relations and Economics Committee (GREC) (2014–2019), and ongoing participation in the GREC Committee. These roles have given me extensive insight into ACRO's operations, strategic priorities, and its unique role as the voice of community and academic radiation oncologists alike. I also hold an MBA from the University of St. Thomas (St. Paul, MN) with an emphasis in health policy.

My professional involvement outside ACRO includes service on several ASTRO committees, where I contributed to health policy and code development initiatives. This work included leadership within the Code Utilization and Application Committee (CUAC), participation on the Code Development Committee and its subcommittees, and service on the ASTRO Nominating and Finance Committees. These experiences have complemented my ACRO work by broadening my understanding of national policy, reimbursement, and coding processes.

Looking ahead, I believe that upcoming changes in payment reform including ROCR, prior authorization challenges, rapid technological evolution, and the ongoing difficulties of delivering value-based care will create important opportunities for ACRO to shape the future of our specialty. I would be honored to continue serving our membership and to help strengthen ACRO's leadership during this pivotal time.

William Noyes, MD MBA
