

I am grateful for the opportunity to run for Chair of the ACRO Resident Committee. Over the past year, I have greatly enjoyed serving on the Education Subcommittee and would be honored to continue my involvement with ACRO in a leadership role. In the upcoming year, I will be on research, which will allow me additional time to dedicate to ACRO and to strengthening the Resident Committee.

As Chair, I hope to continue prioritizing educational initiatives, including shared study resources. This year I have helped lead a project to create a shared Anki deck for studying. I also hope to play a more active role in planning resident-focused events at the annual ACRO meeting. Furthermore, I am committed to further enhancing ACRO's social media presence and increasing engagement among radiation oncology residents nationwide.

I bring leadership experience spanning many years and help lead the Resident Improvement Committee at my institution. I enjoy collaborating with residents across the country and consider myself a clear, approachable, and effective communicator. I welcome feedback that will help improve our committee and would actively seek guidance from mentors who have previously served in this role.

ACRO stands out to me as a professional organization that allows for invaluable networking and mentorship for residents. I will ensure that all residents continue to benefit from the innumerable opportunities ACRO provides during residency and beyond.

Thank you for your consideration. I look forward to the opportunity to continue supporting ACRO and its residents in the years ahead.
