### DISSERTATION

#### *Shared Space and Bicyclist Path Choice*

##### **Abstract**

Shared space is a traffic calming technique and design concept. The technique is relatively new, and the majority of existing research concerns pedestrians only. This mixed methods research focused on intersections in England in order to explore more how cyclists perceive and travel through shared space intersections by observing cyclists as they traverse selected sites and control sites. Using video observations of six sites in three cities, three shared and three control intersections, an analysis of the paths taken by cyclists looked at the variation in the paths ridden through the control intersections as compared to the shared space intersections. A survey addressed the perceptions, bicycling experience, demographics, and path and route preferences by cyclists at both shared space and control intersections. It was hypothesized that cyclist paths would not show much variation between shared space and control intersections and that certain groups may avoid riding through the shared space intersections due to their increased perception of risk. These findings may indicate that shared space designs do not benefit cyclists as the design theory itself states.

## RESEARCH (selected)

---

### **Georgia Tech: School of Civil and Environmental Engineering** **2015-Present**

Contributing my urban agriculture research towards a National Science Foundation (NSF) Sustainable Research (SRN) grant titled SRN: Integrated Urban Infrastructure Solutions for Environmentally Sustainable, Healthy, and Livable Cities. Investigating the potential of urban agriculture to act as green infrastructure. Exploring the role that distributed infrastructure can play in making cities more resilient. Investigating how the built environment impacts a person's wellbeing through the deployment of low cost environmental sensors and mobile phones.

### **Georgia Tech: School of City and Regional Planning** **2009-Present**

Conduct research centered around climate change, design and health. Focused on two CDC funded research projects that investigated the correlations between the built environment, climate change and human health effects. Investigated the impact of climate responsive design techniques on the urban climate. Constructed and analyzed databases for ozone, PM2.5, extreme heat events, heat waves, land cover change, climate action plans, and plant hardiness zones.

#### **Georgia Tech, Co-Instructor**

**Awards:** American Institute of Certified Planners *2014 Student Project Award*  
Georgia Planning Association *2013 Outstanding Student Project Award*  
Florida Academy of Sciences *2013 Student Paper Award*

Co-instructed graduate level studio focused on sea level rise on the Georgia Coast. The studio quantified the overall impact of projected sea level rise on human and physical geographies along the Georgia Coast with a strong emphasis on social vulnerability

### **Urban Environmental Planning & Design: CP 6213**

#### **Georgia Tech, Instructor of Record**

Graduate level class on ecosystem function, environmental policy and design. Designed and led technical labs analyzing environmental impacts in cities using both GIS and remote sensing data, with strong focus on map design and aesthetics.

### **Urban Design Digital Media/Visualization for Planners: CP 8881**

#### **Georgia Tech, Instructor of Record,**

A graduate digital media class focused on representing ideas graphically and communicating them effectively using multiple software platforms.

### EDUCATION

2018 Expected Ph.D. in Urban Planning, Columbia University.

Dissertation: Decolonizing Planning in Haiti – Analysis of the Master’s Planning Tools in Haiti.

Dissertation Chair: Dr. Clara Irazábal.

2010 M.U.P. Taubman College of Architecture & Urban Planning, University of Michigan

2008 B.A. in Planning & Public Policy and Minor in Women’s & Gender Studies,  
Douglass College, Rutgers University.

### RESEARCH INTERESTS

My research agenda is to produce scholarship in service to society. I expose barriers to building beloved communities supportive of Black racial uplift and self-determination. To strive towards a radical, Afrocentric-feminist planning agenda; I use ethnography, historical research and quantitative data analysis to tell planning stories from marginalized groups’ perspectives. The geographic focus is the Caribbean region, particularly Haiti; Caribbean ethnic enclaves in the U.S.; and the transnational networks which connect the Caribbean diaspora across space and time.

## Research

### Co-Project Investigator

March 2016 – Present

*University of Wisconsin - Madison; Madison, WI*

- Worked with the lead project investigator (PI) and academic staff to organize tasks, budgets, and additional research projects.
- Facilitated biweekly research team meetings and two monthly calls with research participants.
- Managed research processes and administrative tasks for a portal development team and a market communication team and each team addressed issues associated with data collection, analysis, interpretation, and reporting. Team personnel include professional web developers and designers, associate research specialists, project assistants, and hourly graduate and undergraduate students.
- Trained the associate research specialist and hourly students on technical assistance and data management, analysis, and interpretation tasks.

### Research Assistant

August 2014 – March 2016

*University of Wisconsin - Madison; Madison, WI*

- Conducted community-based research with the University, the Farmers Market Coalition, and farmers market leaders in 11 states for the Indicators for Impact USDA AFRI grant.
- Developed data collection, analysis, interpretation, and reporting tools at farmers markets. Reviewed the literature to identify the best practices for data collection at farmers markets and reported my findings through reports, memos, and team calls.
- Operationalized 30 unique metrics for paper and online data collection. Organized the metrics into seven instruments to make the work appropriate for the market environment.
  - Customized paper data collection packages, which included implementation protocols and worksheets, for 17 farmers markets.
  - Managed data entry by markets and data cleaning and analysis by hourly students.
- Communicated with market leaders to provide technical assistance and to build their knowledge about the value of data within their organization and community.

## Teaching

### Urban and Regional Planning 463: Evolution of American Planning

Summer 2016

*University of Wisconsin - Madison; Madison, WI*

- Selected to teach by a department screening committee.
- Communicated major themes, events, and people within planning theory and history and connected the information to disparate topics for a pragmatic understanding of the profession over time.
- Engaged students in interactive discussions and educational activities.
- Graded exams and weekly written assignments and managed the Learn@UW class page.

### Consumer Science 360 Teaching Assistant: Sustainable and Socially Just Consumption

Spring 2014

*University of Wisconsin - Madison; Madison, WI*

- Facilitated two one-hour discussion classes per week with approximately 20 students per section.
- Developed weekly lesson plans for each section. Guided the students through large and small group discussions, debates, and educational activities.
- Assisted the instructor in formulating the syllabus, developing assignments, and writing exams.
- Graded exams and weekly written assignments and entered grades into Moodle in a timely manner.

Environmental Planner | Landscape Architect | [jfwinslow@gmail.com](mailto:jfwinslow@gmail.com)

### VITA

I conduct interdisciplinary research on sustainable environmental planning at the intersection of health and the built environment. Specific interests focus on integrating biophysical and cultural ecosystem services with community well-being. Teaching experience includes both graduate and undergraduate courses at various scales in environmental planning, site planning, and urban design. My work is informed by my professional practice experience in planning and landscape architecture throughout the United States.
