American Society for Aesthetics

Policy on the Use of Video Presentations at ASA Annual Meetings

Approved by the ASA Board of Trustees on January 29, 2020

As the use of Skype and comparable video presentations at ASA Annual meetings significantly reduces opportunities for dialogue and discussion, reduces registration revenues, and presents expensive technology challenges for ASA, their use at ASA Annual Meetings, commencing in 2020, shall be prohibited, with the following exceptions: (a) When essential to meet the requirements for a participant of the Americans with Disabilities Act or (b) When the necessary travel visa is denied by the host country; in the case of these exceptions, participants shall notify both the program chair and the Secretary-Treasurer at the earliest opportunity so they can make necessary arrangements.
