ELECTION RESULTS ANNOUNCED

WOODFORK TO BE PRESIDENT-ELECT

Larry D. Woodfork, CPGS 2370, Assistant State Geologist, West Virginia Geological and Economic Survey, Morgantown, WV, has been voted President-Elect of the American Institute of Professional Geologists. He defeated Suzanne Takken, CPGS 568, an independent consultant from Oklahoma City, OK, in balloting for the position. Woodfork will serve as 1983 President of the Institute.

Woodfork, Grafton and Melickian will next year team with AIPG 1982 President M. O. Turner, CPGS 1046, an independent consultant from San Antonio, TX, and 1982 Institute Editor Russell R. Dutcher, CPGS 1644, Head of the Geology Department at Southern Illinois University, Carbondale, IL.

Elected 1982 Secretary-Treasurer of the Institute was Gary E. Melickian, CPGS 1700, Dames & Moore, Washington, D.C. He defeated Travis H. Hughes, CPGS 3529, Chairman of the Geology Department, University of Alabama, Tuscaloosa, AL, in the voting for that office.

In other election results announced September 24th, Dean Grafton, CPGS 565, Geological Associate, Cities Service Company, Houston, TX, was elected AIPG Vice President for 1982. Grafton won over Russell G. Slayback, CPGS 2305, Vice President & Director, Brashears, & Graham, Inc., Wilton, CT, in the voting.

**Last Call For Meetings!**

You must act **now** if you plan to attend the Institute's Annual Meeting in Williamsburg, Virginia, October 21-24. The meeting headquarters hotel, Holiday Inn 1776, Williamsburg, still has a few rooms left. Call (804) 220-1776 to make your reservations. A credit card charge is required to guarantee.

Last call for the AIPG Public Affairs Conference in Washington, D.C. October 19th and 20th! Take an active part in your Institute's efforts to impress key Washington legislators and Federal agency officials with our interest. Your support is crucial! **Call** National Headquarters **today** and reserve your place for the Public Affairs Conference. Make your room reservations with Gramercy Inn in Washington by calling (202) 347-9550.
"INSTITUTE WORK" OR "THE "WORK OF THE INSTITUTE"

By John W. Rold
AIPG President

Some years ago at a church meeting I heard a pastor make the statement "Regrettably many people become so involved in church work that they never have time to do the work of the church." Many times in the past two years I have thought of that statement as it concerns the conduct of business within AIPG.

AIPG's activities certainly subdivide into those same two types of work—the necessary and time-consuming administrative, or paper work, which makes the organization run, and the work which is needed to meet the true goals of the organization.

The administrative or paper work part of the organization must become the mechanism for achieving our goals. Considerable time and effort is required to achieve efficiency in those necessary operations. We need an efficient flow of organizational activities. We need to process membership applications, collect dues, pay bills, carry on communication with sections and committees, and communicate through the Executive Committee to sections, committees, and the members. We must hold national and sectional elections to carry out the constitutional requirements. Accounting and fiscal management require considerable time and effort. Fortunately, these activities now seem to be well organized and running smoothly and we can turn to utilizing those activities to achieve the real purposes of the organization.

Fortunately for AIPG, our purposes are concisely stated in Article 2 of the Constitution. "The purpose of the Institute shall be:

1. To strengthen the geological sciences as a profession.

2. To establish professional qualifications for, and to evaluate continuously, the conduct of geological scientists.

3. To enhance and to preserve the standing of the geological sciences as a profession.

4. To establish ethical standards that insure the protection of the public health, safety and welfare and the profession from non-professional practices from within the profession of the geological sciences.

5. To monitor at all levels governmental and other activity affecting the geological sciences and to communicate with the public and others concerning the profession of geological sciences.

6. To take all reasonable actions necessary to strengthen the geological sciences as a profession and to further the stated purposes of the association."

These are the sole and total reasons for the existence of AIPG. Everything which AIPG does and everything it's involved with should be designed to achieve those purposes or facilitate their achievement.

Several examples of activities stressed by this year's Executive Committee are directly aimed at achieving those goals:

Membership drive. The highly successful membership drive was not designed just to increase the number of AIPG members. We have no burning desire to be the biggest geological association, but we must increase our membership if we are to increase our representation. We must involve more geologists in achieving the Institute's worthwhile goals for their own benefit. Increasing membership increases the number of talented people that are available for addressing the tasks necessary to achieve these goals. Because we have a very efficient headquarters office, only part of a member's dues are required to service that member. A sizable portion is available for other programs. Increased membership therefore provides greater financial support for desirable activities which benefit the entire profession.

Education Committee. Certainly the work of the Education Committee, which this year is aimed at evaluating and finding solutions for the problems of geological education, falls within the category of strengthening the profession. We cannot be stronger than the educational foundations of our members. The liaison between the professional societies and the educational institutions must be improved and strengthened if we are to enhance and improve the profession and raise the base level competency of geologists.

Screening Committee. Fortunately, this year our Screening Committees throughout the Country have faced a much heavier workload than in preceding years. Their work must not be looked upon as an administrative hurdle to be jumped by applicants, but must be a serious evaluation of the charge to set standards for our members and to establish and apply the qualifications of geologists. They establish the baseline qualifications of "Certified Professional Geological Scientists" against which the conduct of each member of the geological profession could well be measured.

Annual Meetings. An annual meeting obviously entails many mechanical and constitutional requirements. Hopefully, the combination of social and educational activities will make this year's Annual Meeting a memorable occasion. However, the real reason for this meeting, as well as any others, should be advancing the goals of the Institute.

State Section Organization and Activities. The concerted effort to broaden AIPG's base into more states by reactivating sections and creating new ones has been quite effective. Again, the major reason must not be just a larger scoreboard number of sections on the rolls. We must have a mechanism to more effectively achieve the Institute's goals in many individual states and to provide a broader, more effective base in dealing with geological problems at a national level.

Through our membership drive, our diligent public relations effort through Ruth Anna and the skillful work of Vic Tannehill, our Executive Director, we have considerably enhanced the name of AIPG and measurable increased its visibility. The ultimate objective must be to provide a stronger mechanism for achieving our true goals. With the increase in membership and the improvement in efficiency at headquarters, we now have the ability to apply our talents toward those goals. Institute work is necessary, but only as a means of increasing, strengthening and improving the "work of the Institute."

OCTOBER 21-24, 1981
AIPG Members in Alaska

Members of the Institute in the State of Alaska have elected the following Section officers:

President - Thomas P. O. Dowell, Jr.
Vice President - Lum Lovely
Secretary-Treasurer - Jim McCaslin Brown
Chairman Screening Committee - Thomas P. O. Dowell, Jr.

AIPG President John Rold had the opportunity to travel to Alaska recently. He was in Anchorage to speak at a joint meeting of the Alaska Section and the Alaska Geological Society. The meeting was held September 16th.

The Florida Section is considering publishing a Who's Who of Florida AIPG. The format could be up to one page per member including a photograph, listing of education, work experience, areas of interest, publications and other professional affiliations, etc. The object would be to have a handbook so that members could know more about each other. This would be helpful from one member to another as well as to government entities who might have need for a professional geologist.

Georgia, Hawaii, Idaho Sections Pending

A new AIPG Section is being formed among Members in the State of Georgia. This effort is being led by Earl G. Hoover, Atlanta. A mailing from National has brought a favorable response and efforts are underway to solicit the required number of petition signers.

Although there are presently only a few Institute Members in Hawaii, they too have indicated interest in forming a Section. William E. West of Honolulu has agreed to serve as interim President.

Two active AIPGers in Idaho are jointly working to organize Members in that State into a new Section. Mont Warner and Bernie Guarnera, both of Boise, are hard at it. The necessary number of signatures on petitions are expected soon and an organizational luncheon will be held shortly.

Iowa-Nebraska Sections Reorganizing

Members in the two States are now trying to reactivate their AIPG Section. As a necessary first step in the reorganization, volunteer interim Section officers are being sought.

Dr. William J. Wayne, head of the Department of Geology at the University of Nebraska, Lincoln, is acting as temporary head of the Section. John A. Albritton, of Omaha is interim Section Secretary-Treasurer.

A meeting will be planned in the near future and an announcement will be mailed to all Iowa and Nebraska AIPG Members.

New "Capitol" Section Petitions for Recognition

National Headquarters has received from Members in Maryland, Delaware and the District of Columbia enough written requests to petition for the new Capitol Section. The application will be submitted to the Executive Committee at their next meeting, in Washington, D.C., October 18th.

Under the leadership and direction of a "working committee" headed by Gordon Everett, a mailing went out from National six weeks ago to AIPG Members in the two States and the District. Their response was immediate and positive.

A proposed set of Bylaws was approved. An organizational luncheon meeting was planned and held in the District September 14th. Officers elected for 1981-82 were:

President: A. Gordon Everett
Vice President: George H. Davis
Secretary-Treasurer: Jeffrey P. Sgambati
Screening Chairman: Dennis S. Kostick

AIPG now has 41 Members in the two States and the District of Columbia and the prospects are excellent for many more. With the assistance of the new Capitol Section Members the job will be done.

New Section Organized

Members in Nevada have responded favorably approving a petition for a new Nevada Section. Their application now goes to the Executive Committee at their meeting in Washington, D.C., in October.

The Steering Committee will set a date, time and place for a Nevada Section organizational meeting. First order of business at that meeting will be to officially elect 1981-82 officers and Advisory Board Delegates. The Section has called for volunteer nominees. Joe H. Kenny, Las Vegas, is serving as interim Section President and has been leading the effort to get this new Nevada Section organized.

Washington Section Being Reactivated

Members in the State of Washington are attempting to reactivate the existing AIPG Section there. In recent years the Institute has experienced some difficulty in keeping a Washington Section going, to some degree because of the distance between the three major population centers of the State.

The revitalization effort is being spearheaded by Donald M. Ford, Lacey, WA, who is serving as interim President; Ted O. Price, Richland, WA, interim Vice President; Ernie Gilmore, Cheney, WA, interim Screening Committee Chairman; and, Wayne Felts, Olympia, WA, interim Secretary-Treasurer. A reorganizational meeting is being planned and will be announced shortly.

West Virginia

Editor- Robert Metzler
445 W. Main Street
Clarksburg, WV 26301
(304) 623-3611

The West Virginia Section held its Annual Meeting Friday afternoon and evening, October 2nd, at the Capitol Complex Conference Center, Charleston.

Presentations included:

"Exploration & Geology of the Central Portion of the Eastern Overthrust Belt - Past, Present & Future" - Rich Drabish, Columbia Gas

"Snow & Ice Removal from Pavement Using Stored Earth Energy" (Film) - John Baldwin, W. Va. DOH

A business meeting, cocktail party, and dinner followed.
OFFICIAL NOTICE OF ANNUAL MEETING

The Annual Business Meeting of the American Institute of Professional Geologists will be held at the Holiday Inn 1776, Williamsburg, Virginia, Friday, October 23, 1981, 11:45 AM. The meeting will be called to order by President John W. Rold.

A roll call will be held by self introduction of those present. Members, spouses and guests are invited to attend this meeting and luncheon.

President Rold will give the results of the 1982 national AIPG elections and will introduce those elected. He will also give the State of the Institute address.

Other business will be transacted and any Amendments to the AIPG Bylaws will also be considered at this meeting.

AIPG BOOTH AT UPCOMING MEETING

Executive Director Vic Tannehill, President John Rold and President-Elect M. O. Turner will be manning the Institute's booth at two upcoming "sister society" annual meetings.

The three, joined by Executive Committee members in attendance, will be representing AIPG at our exhibit at the Association of Engineering Geologists Annual Meeting at the Hilton Hotel, Portland, Oregon, September 27 - October 3.

They will also be attending the Annual Meeting of the Geological Society of America, November 2-5, at the Convention - Exposition Center, Cincinnati, Ohio.

All AIPG members at these meetings are urged to stop by the Institute's booth and say "hello".

SCREENING COMMITTEES BUSY

AIPG Section Screening Committees around the Country are currently hard at work evaluating the qualifications of a record number of applicants.

A recent report from Headquarters showed a grand total of 259 applicants being processed. Of that number, the files of 135 were in the hands of Screening Committees.

The Institute's officers, who must each give their final approval, are also faced with quite an applicant workload. Thirty-four individuals were under their review.
INVESTMENT IN PROGRESS
FOR GEOLOGICAL SCIENTISTS

The American Institute of Professional Geologists has officially established a Foundation as a means for members to contribute tax-exempt money to further educate geological scientists and the public about geology-related matters. Research and educational activities will become on-going programs of the Institute and funded by the Foundation.

AIPG Foundation

TO: All AIPG Members
RE: AIPG Foundation

Investment in progress for all professional geological scientists.

You are part of a professional organization promoting the highest standards of competency, increased knowledge, professional experiences and intense efforts of interest to geological scientists.

AIPG represents all facets of the profession and is proud of becoming more visible on the national scene, being listened to by other organizations & the media, and by politicians.

When you contribute to AIPG’s Foundation you are making a long-term investment that will pay dividends to your profession...in career and public education and in the preservation of professional standards and ethics.

Your gifts will support scholarships, youth & adult education, professional seminars, career development, continuing education on the law- and rule-making processes & the media, and encourage research in the geologic sciences.

The Foundation projects may include: continued publication of Professional Guides & Practices; more emphasis on Position Papers; annual lectures by distinguished geological scientists at colleges and universities; national Speakers Bureau; research grants & scholarships; assistance to government leaders through testimony, background data, and analysis; and local geologic-related seminars and forums.

The Foundation is an ambitious plan—a plan with great growth potential. You can be part of that growth. Your tax deductible contribution to the Foundation may be in honor of a friend, a family member or a professional associate, or as an investment in your future. And, don't forget to ask your employer to match your gift.

To: American Institute of Professional Geologists P.O. Box 957 Golden, CO 80401

I enclose a contribution of $____________________________ for the AIPG Foundation.

It is given:
In honor of:__________________________________________
In Memory of:________________________________________
As a general contribution_ ______________________________
Other (specify):______________________________________

Please notify _________________________________________

Given by_____________________________________________

(Contributions are TAX-DEDUCTIBLE.)
PUBLICATIONS

Guides and Practices
Offered as Bound Set

AIPG's informative, valuable and well-written "Professional Guides and Practices" are now offered as a complete set in a special three-ring binder for the price of $35.00 postpaid. Order from Headquarters.

The set incorporates all of the Institute's current offerings in a sturdy light blue vinyl 2½ wide loose leaf binder. The items are tab indexed. Space is provided for the addition of new "Professional Guides and Practices" as they are released.

This special offer will provide purchasers with some 200 pages of interesting and readable text. Many of the articles are illustrated by charts, graphs or drawings.

The following titles are included:

PROFESSIONAL GUIDES

Appraisal of High Bulk, Low Unit Value Mineral Deposits

College Curricula for Professional Practice of Earth Sciences

Guide to Registration of Geologists

Organization and Content of a Typical Geologic Report

The Professional Geologist as an Expert Witness

Understanding Mineral Resources

Use of Geology in Reclamation of Surface Mined Land

Valuation of Metallic Ore Deposits

Geologic Logging and Sampling of Rock Core for Engineering Purposes

SUGGESTED PRACTICES

Investigation of Potential Mineral Aggregate Sources

Use of Geology at Portland Cement Operations

Western Mining Directory Available

Copies of the 1981-82 Western Mining Directory are now off the press.

This up-dated 4th Edition reference lists active/hardrock mines, coal mines, uranium/vanadium mines, mining companies and the West's active oil shale projects. Also listed are consultants, contractor-developers, equipment suppliers and exploration and drilling companies in the thirteen Western States. This 250-page publication gives names, addresses and phone numbers.

It is available from WMD, 311 Steele Street, Denver, CO 80206.

GEOLOGISTS IN TOP SALARY RANKS

Two recent studies show that salaries for geologists are among the highest for any profession in the United States.

A recent study by Vine Associates reports "median salary for five-year earth scientists, on average, reached a record level of $42,800. Nationwide non-supervisory geologists with 5-7 years' experience range from $26,000 to $40,800 with the upper decile $38,100." The Vine study also shows salaries for senior level specialists (with 10 or more years' experience) ranging from $36,100 to $68,600.

A study by Rome Arnold & Co. for AAPG shows that the average member of the society has a salary of $49,390. About 75% of the membership earn in excess of $35,000.

POSITIONS GEOLOGISTS CAN FILL

1. Chief Geologist - U.S.G.S.
2. Assistant Chief Geologist - U.S.G.S.
3. Office Chief - U.S.G.S. (#1)
4. Office Chief - U.S.G.S. (#2)

'81 AND '82 ADVISORY BOARDS TO MEET

The 1981 AIPG Advisory Board meeting is scheduled for Wednesday, October 21, 1981, 2:00 P.M., at the Holiday Inn 1776, U. S. 60 Bypass Road, Williamsburg, VA, in conjunction with AIPG's Annual Meeting.

The 1982 Advisory Board will meet immediately after at approximately 4:00 P.M.

Chairman of the '81 Board, M. O. Turner, AIPG President-Elect, and '82 Board Chairman 1982 AIPG President-Elect Larry D. Woodfork, have called for agenda items from the Delegates, who are in most cases 1981 or 1982 Section Presidents. All Members are welcome to attend both meetings.

Purpose of the Advisory Board is to discuss and make recommendations to the Institute's Executive Committee on matters of policy. The Board, which meets once or twice a year, also considers questions put to it by the Executive Committee.

In officially acting on matters brought before them, Advisory Board Delegates are entitled, per the Institute's Bylaws, to cast a certain number of votes, depending on how many Members their Section has as of the end of September.

The 1982 Advisory Board at this meeting will also elect from its membership six delegates to the AIPG Executive Committee: three to serve one-year terms and three to serve two-year terms. The Section's designated representatives are now being asked if they are willing to be nominated to serve. Results will be announced in the November TPG.
