FRONT COVER — Glacially polished Stromatolites of the Upper Cambrian Hoyt Formation at Petrified Sea Gardens Natural National Landmark located in Saratoga Springs, New York. The original structures were formed by the successive trapping of sediment by cyanobacteria in shallow equatorial seas 490 million years ago. The largest of the circular structures visible in the photograph are 1-2 feet in diameter.

American Institute of Professional Geologists (AIPG) is the only national organization that certifies the competence and ethical conduct of geological scientists in all branches of the science. It adheres to the principles of professional responsibility and public service, and is the ombudsman for the geological profession. It was founded in 1963 to promote the profession of geology and to provide certification for geologists to establish a standard of excellence for the profession. Since then, more than 10,000 individuals have demonstrated their commitment to the highest levels of competence and ethical conduct and been certified by AIPG.

The mission of the American Institute of Professional Geologists (AIPG) is to be the superior advocate for geologists and geologists, to promote high standards of ethical conduct, and to support geologists in their continuing professional development.
