THE PROFESSIONAL GEOLOGIST

JANUARY/FEBRUARY 2006

VOLUME 43, NUMBER 1

STUDENT ARTICLES
Setting the Stage for Disaster: A look at the conditions surrounding Katrina's landfall in New Orleans ........................................... 6-9
Temporal Trends of Temperature and Geochemistry for Two Acid Salt Lakes in Western Australia............................................. 9
The Questa Rock Pile Weathering Project: A Rare Opportunity for NMIMT Students ................................................................. 10-13

AIPG STUDENT CHAPTERS WRITE IN ......................................................... 34-35

AIPG 2005 MEETING COVERAGE
Review ................................................................................................. 36
Abstracts .......................................................................................... 37-42
Honors and Awards .......................................................................... 43-52
Report from the AIPG Past-President’s Breakfast ................................. 52
Photos ............................................................................................... 91-92

ADVICE TO STUDENTS
Comments and thoughts from AIPG Members ........................................ 53-60
Maintaining a Professional Activities Log for CPD and Other Reporting ......................................................... 61-62
Dear Students: Welcome to the Profession! ......................................... 63
Rock Fall Simulation ........................................................................... 64-65
Engineers vs. Scientists ..................................................................... 66-68
Cyprus ................................................................................................ 68
So……. You Want to Teach? ................................................................. 69-71
The Changing Landscape of the Geoscience Employment ..................... 72-73
The Importance of Spatial Concepts in the Geosciences ....................... 74
Knowledge Base and Task Analysis for the 2005 Fundamentals of Geochemistry Examination .................................................... 75-77
The National Cooperative Geologic Mapping EDMAP Program ................. 79-80
A Typical Week for a Consultant Geologist in the Construction Materials Industry in the U.K. .............................................................. 81-82
Geology and Environmental Science Officers in the U.S. Army .................. 83-85
Students at Work ................................................................................ 86-90

AIPG Store Order Form ..................................................................... 91

DEPARTMENTS
EDITOR’S CORNER .................................................................................. 2
LETTER TO THE EDITOR ..................................................................... 3
MEMBERS IN THE NEWS .................................................................. 4-5
SECTION NEWS .................................................................................. 12-13
IN MEMORY ......................................................................................... 16-17
PRESIDENT’S MESSAGE .................................................................. 18-19
EXECUTIVE DIRECTOR’S COLUMN .................................................. 20
TEST YOUR KNOWLEDGE ................................................................. 20
PROFESSIONAL ETHICS AND PRACTICES .................................. 21-23
MEASURING THE PROFESSION .................................................... 24-25
PROFESSIONAL LIABILITY AND RISK MGMT. ......................... 26-27
STUDENT’S VOICE .......................................................................... 28-29
NEW APPLICATIONS AND MEMBERS ........................................ 30-32
NEW PUBLICATIONS/WEB SITE .................................................... 33-35
PROFESSIONAL SERVICES DIRECTORY ..................................... 36

Faces of the American Institute of Professional Geologists (AIPG) is the only national organization that certifies the competence and ethical conduct of geological scientists in all branches of the science. It adheres to the principles of professional responsibility and public service, and is the ombudsman for the geological profession. It was founded in 1963 to promote the profession of geology and to provide certification for geologists to establish a standard of excellence for the profession. Since then, more than 10,000 individuals have demonstrated their commitment to the highest levels of competence and ethical conduct and been certified by AIPG.

The mission of the American Institute of Professional Geologists (AIPG) is to be the superior advocate for geology and geologists, to promote the highest standards of ethical conduct, and to support geologists in their continuing professional development.
