Cover: Victoria Falls, Zambia/Zimbabwe. Photo was taken looking east from half-way down the falls at the Zimbabwe end. The falls are located at 17:55:28S, 25:51:24 E and are 355 feet high and 1708M (5605 feet) wide. The average volume of water going over them is 1088m3/s, or 38,430cfs, but it varies during the year from 3,000 cfs to 105,000 cfs. By John Berry, CPG-04032.
The mission of the American Institute of Professional Geologists (AIPG) is to be an effective advocate for the profession of geology and to serve its members through activities and programs that support continuing professional development and promote high standards of ethical conduct.

American Institute of Professional Geologists (AIPG) is the only national organization that certifies the competence and ethical conduct of geological scientists in all branches of the science. It adheres to the principles of professional responsibility and public service, and is the ombudsman for the geological profession. It was founded in 1963 to promote the profession of geology and to provide certification for geologists to establish a standard of excellence for the profession. Since then, more than 10,000 individuals have demonstrated their commitment to the principles of professional responsibility and public service, and to provide certification for geologists to establish a standard of excellence for the profession. Since then, more than 10,000 individuals have demonstrated their commitment to the highest levels of competence and ethical conduct and been certified by AIPG.
