On the Cover: The Ajo Mountain range in Organ Pipe Cactus National Monument. The volcanic range is located in the extreme southwestern corner of Arizona and the Monument shares a border with Mexico. The lithologies include a bottom rhyolite unit overlain by flows of breccia and ash-fall tuff, capped with more rhyolite. Early people used volcanic rock for tools and the abundant mica to amend clay used for pottery. Photo Courtesy of Dawn Garcia, CPG-08313

AIPG Publication Policy, October 4, 2010. AIPG encourages submission of articles and editorials for publication in TPG on topics related to the science and profession of geology. Submitters shall be of interest to the members of AIPG, other professional geologists, and others interested in the earth sciences. Articles and editorials may be noted as follows at the discretion of the Editor. “The opinions, positions and conclusions presented herein are those of the author and do not necessarily reflect the opinions, positions or conclusions of the American Institute of Professional Geologists.” All materials submitted for publication, including author opinions contained therein, shall include accurate and appropriate references. The Editor has the authority to solicit, edit, accept, or reject articles and editorials and other written material for publication. The Executive Committee has the authority if it so chooses to act on any particular case to support or overrule actions of the Editor regarding the solicitation, editing, acceptance, or rejection of any particular article, editorial, or other written material for publication.

American Institute of Professional Geologists (AIPG) is the only national organization that certifies the competence and ethical conduct of geologists in all branches of the science. It adheres to the principles of professional responsibility and public service, and is the ombudsman for the American profession of geology. It was founded in 1963 to promote the profession of geology and to provide certification for geologists to establish a standard of excellence for the profession. Since then, more than 10,000 individuals have demonstrated their commitment to the highest levels of competence and ethical conduct and been certified by AIPG.

The mission of the American Institute of Professional Geologists (AIPG) is to be an effective advocate for the profession of geology and to serve its members through activities and programs that support continued professional development and promote high standards of ethical conduct.

The Professional Geologist uses opcode WES462 for AIPG news and activities. goto www.aipg.org
