On the Cover: Pictured Rocks National Lakeshore, Michigan. The rocks are 50-200 foot tall mineral stained sandstone cliffs. The mineral staining creates the beautiful colors. The Munising and Au Train formations date back as far as the Cambrian. Photo credit: Sara Pearson, CPG-10650.

American Institute of Professional Geologists (AIPG) is the only national organization that certifies the competence and ethical conduct of geological scientists in all branches of the science. It adheres to the principles of professional responsibility and public service, and is the ombudsman for the geological profession. It was founded in 1963 to promote the profession of geology and to provide certification for geologists to establish a standard of excellence for the profession. Since then, more than 12,000 individuals have demonstrated their commitment to the highest levels of competence and ethical conduct and have been certified by AIPG.

The mission of the American Institute of Professional Geologists (AIPG) is to be an effective advocate for the profession of geology and to serve its members through activities and programs that support continuing professional development and promote high standards of ethical conduct.
