

SEP 30 – OCT 2

FIELD TRIP

ST. FRANCOIS

MOUNTAINS

Joint AIPG IL-IN Section and University of Illinois Department of Geology Field Trip!

The St. Francois Mountains in southeast Missouri are a range of Precambrian igneous rocks rising over the Ozark Plateau. This range is one of the oldest exposures of igneous rock in North America, formed by volcanic and intrusive activity 1.5 billion years ago. Come join University of Illinois students and faculty as we explore the geology around the highest point in Missouri!

**A limited number
of campsites have
been reserved,
RSVP today!**

**FREE trip includes
Fri and Sat night
walk-in sites at
