"One is so much
less than two"
John Tukey

Description: Eleven projects, their solutions and corresponding WORD files are provided. The WORD files can be downloaded and assigned to your students. The WORD files can also be modified. Step by step instructions for using the TI 83 / 84 calculator for list management, evaluating formulas, using memory, entering data, finding basic statistics and graphing are included. These projects are used in both my online and traditional classroom Gen Ed Math course.

Online Handouts available at

<http://online.morainevalley.edu/websupported/jsukta/handouts/GenEdMathProjects.htm>

	<p style="text-align: center;"><u>List (data) Management</u></p> <p style="text-align: center;">Select the TI-83 or the TI-Smartview screen to learn about:</p> <ul style="list-style-type: none">• Saving data lists (STAT editor, L1 - L6) to named lists.• Recalling named lists to the STAT editor (L1 - L6).• Transferring lists from your calculator to TI-Smartview.	
 WORD 97, .doc files  WORD 07, .docx files"	<p>Select the WORD icon on the left to be taken to the WORD documents (.doc and .docx files) for the projects.</p> <p>When you select a document, select "Cancel" if authentication information is requested. The document will then be displayed.</p>	

Rationales and Projects:

1. Project: Simple and Compound Interest

How much money will be in their grandchild's college fund 18 years from now?
How much money must newlyweds deposit today to have \$10,000 twenty-five years from now?

Rationale Car When the loan officer states that "The simple interest formula is used to calculate the monthly interest", he is telling the truth. However what is being used for the principal? Is it the amount of the loan or the remaining balance?

2. Project: Car Purchase

Rationale Home What is my actual payment? What is Escrow? Should I refinance?

3. Project: Home Purchase

4. Project: Annuities in Real Life

How much should I deposit monthly
A. Starting at birth for my child's college education

**Do You
Want Fries
with that?**

- fund?
- B. Starting on our wedding day for a 25th wedding anniversary cruise?
 - C. To have enough money to start my own business?
 - D. To have enough money to retire and not have to work in order to supplement my retirement?

U.S. NATIONAL DEBT CLOCK

The Outstanding Public Debt as of 12 Oct 2009

\$11,911,682,662,176.58

The estimated population of the United States is **307,084,684** so each citizen's share of this debt is **\$38,789.56**.

5. [Project National Debt](#)

How far can a stack of \$1 bills equal to the national debt extend? Will it reach the moon?

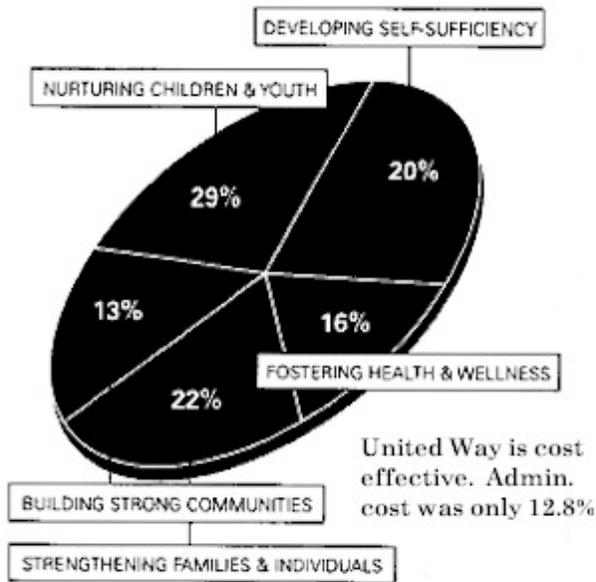

Click on the National Debt above to view the current debt.

[Rationale Home Renovation](#)

Perimeter, area and volume are studied with the purpose of applying these geometric concepts to home improvement (renovation) projects.

6. [Project: Home Renovation](#)

[Rationale: Descriptive Statistics.](#)

How difficult is it to construct a pie chart?

7. [Project: Qualitative Data](#)

8. [Project: Quantitative Data](#)

Use Descriptive Statistics to organize raw data into a table, make graphs, find measures of central tendency, dispersion, and outliers.

WIN A **\$1 MILLION** DREAM HOME,
or \$1,000,000 in Cash!

Rationale: Probability Distributions.

How can the Las Vegas and riverboat casinos make money on their table games, video poker games, and slot machines?

9. Project: Raffle

The actual raffle site is:

<http://www.houseofdreamscharityraffle.org/Index.aspx>

10. **Project: Venn Diagram** Calculate the probabilities and odds for a patient experiencing an adverse side effect after taking an experimental allergy medication.

Note: Turn down your speakers. This site has a sound file in the background.

11. Project: Normal Distribution

Calculate probabilities for a given x and determine x for a given probability.

Both probability tables and the built in functions of the TI 83/84 series calculator will be used.
