### Total Electric Retail Customers

- **North Carolina**: 3.2 million
- **South Carolina**: 720,000
- **Ohio**: 690,000
- **Indiana**: 800,000
- **Kentucky**: 140,000
- **Florida**: 1.7 million

### Total Gas Customers

- **Ohio**: 500,000
- **Kentucky**: 100,000

Duke Energy Service Territory – Regulated Utilities
Duke Energy Carolinas:
Duke Energy Carolinas generates, transmits, distributes and sells electricity in central and western North Carolina and western South Carolina. Duke Energy Carolinas’ service area covers 24,000 square miles and supplies electric services to 2.4 million residential, general service and industrial customers.

Duke Energy Progress:
Duke Energy Progress’ service area covers approximately 34,000 square miles, including a substantial portion of the coastal plain of North Carolina extending from the Piedmont to the Atlantic coast between the Pamlico River and the South Carolina border, the lower Piedmont section of North Carolina, an area in western North Carolina in and around the city of Asheville and an area in the northeastern portion of South Carolina. Duke Energy Progress provides electric services to approximately 1.5 million residential, general service and industrial customers.

Duke Energy Indiana:
Duke Energy Indiana generates, transmits and distributes electricity in central, north central and southern Indiana. Its service area covers 23,000 square miles. Duke Energy Indiana supplies electric services to 800,000 residential, general service and industrial customers.

Duke Energy Ohio:
Duke Energy Ohio’s Regulated Utilities service area covers 3,000 square miles and supplies electric services to 690,000 residential, general service and industrial customers and provides regulated transmission and distribution services for natural gas to 400,000 customers.

Duke Energy Kentucky:
Duke Energy Kentucky’s operations provide approximately 1,000 megawatts of owned electric capacity to approximately 140,000 customers. The company also provides natural gas services to approximately 100,000 customers in Northern Kentucky.

Duke Energy Florida:
Duke Energy Florida’s service area covers approximately 20,000 square miles in west-central Florida and the Panhandle, and includes the densely populated areas around Orlando, as well as the cities of St. Petersburg and Clearwater. Duke Energy Florida is interconnected with 22 municipal and nine rural electric cooperative systems. Duke Energy Florida provides electric services to approximately 1.7 million residential, general service and industrial customers.

Commercial Power:
Commercial Power owns, operates and manages power plants and engages in the wholesale marketing and procurement of electric power, fuel and emission allowances related to these plants as well as other contractual positions. Commercial Power’s generation operations, excluding renewable energy generation assets, consist primarily of coal-fired and gas-fired nonregulated generation assets which are dispatched into wholesale markets. The company announced in February 2014 it has begun the process to sell all of its unregulated generation in Ohio, Illinois and Pennsylvania.

Commercial Power also has a retail sales subsidiary, Duke Energy Retail, which is certified by the PUCO as a Competitive Retail Electric Supplier (CRES) provider in Ohio. Duke Energy Retail serves retail electric and natural gas customers in southwest, west central and northern Ohio with energy and other energy services at competitive rates.

Duke Energy Renewables:
Duke Energy Renewables is a leader in developing innovative wind and solar energy generation projects for customers throughout the United States. The company’s growing portfolio of commercial renewable assets includes 15 wind farms and 21 solar farms in operation in 12 states, totaling almost 1,800 megawatts in electric-generating capacity. Learn more at duke-energy.com/renewables.

International Energy:

International Energy’s customers include retail distributors, electric utilities, independent power producers, marketers and industrial/commercial companies. International Energy’s current strategy is focused on optimizing the value of its current Latin American portfolio and expanding the portfolio through investment in generation opportunities in Latin America.

International Energy owns, operates or has substantial interests in approximately 4,900 gross megawatts of generation facilities.
