

# Introducing Hypothesis Testing with Simulations

**Irina Timchenko**

*Piedmont Virginia Community College*

## Abstract:

This article presents a computer simulation task for introducing hypothesis testing. The activity helps students understand the logic of hypotheses testing and the associated concepts. The article discusses student initial difficulties with the activity and their reactions to using the simulation.

**Irina Timchenko** is a full-time mathematics faculty at Piedmont Virginia Community College. She has been teaching mathematics and statistics courses for 12 years. She has recently completed a doctorate degree in curriculum and instruction with emphasis in mathematics education. She is interested in using technology to develop students' conceptual understanding of mathematical ideas and advance their problem-solving skills.
