Sustaining Corporate Sponsors
Dear ASCET Members.

Hello everyone! I would like to thank all our local chapter officers, members and corporate sponsors for their participation and going above and beyond their respective duties when asked. It does not go unappreciated.

If you did not attend your December local chapter meeting you may have missed out on some fun and great gifts.

This February bring a non-member to your local chapter meeting. Let’s make this February a membership drive month to promote ASCET. If you know someone who is NICET certified and currently not a member of ASCET please invite them to attend the next meeting in your region. Explain to them how they can easily incur CPD points for recertification. Get them to sign up for your local chapter and National while in attendance.

Future items happening in the Northeast this year…

The New England Association of Fire Protection System Designers put on a powerful annual spring convention. If you get a chance to visit this year you will not be disappointed. I will send information and updates in future emails with the dates.

The CT chapter is performing a regional meeting this year on June 8, 2020 at Honeywell in Northford, CT. There will be limited attendance to this meeting based on classroom space and facility tours. Please contact Kyle Watterworth if you are interested in attending. president@ctascet.org updates in future emails with the dates.

I will keep in touch with future emails updating local chapter information. If you are not a current member of national, please sign up today at www.ascet.org

Respectfully,

Steven S. Redden, SET
ASCET Northeast Regional Vice President
From the desk of the Northeastern Regional Vice President

Steven Redden

Delaware Regional Meeting at General Air facility. Thank you General Air for hosting the regional meeting and your support of ASCET.
2020 ASCET NATIONAL EVENTS

Grundfos is a global leader in advanced pump solutions and a trendsetter in water technology, supplying complete pumping systems and solutions for buildings, industry and every aspect of water use. An annual production of more than 16 million pump units makes Grundfos a leading pump manufacturer with more than 18,000 employees worldwide. We have a complete line of UL listed and FM approved fire pumps with our Peerless Pumps brand. Other key products include circulator and centrifugal pumps for industry, water supply, sewage and dosing; as well as standard and submersible motors and state-of-the-art electronics for monitoring and controlling pumps. In the U.S. we have more than 1,200 employees staff operations, sales and service facilities in Illinois (North American HQ), Kansas, Pennsylvania, California, Texas, Indiana and Alabama. Grundfos provides comprehensive market coverage in North America through a number of marquee product brands, with more than 765 years of service combined.

High on the company’s corporate agenda is an active commitment to improving the environment. Grundfos contributes to global sustainability by pioneering technologies that improve quality of life for people and care for the planet.

PERIMETER SOLUTIONS SUPPORTS AUSTRALIAN BUSHFIRE SUPPRESSION EFFORTS

To support increased air tanker operations during this period of extreme and tragic fire activity, the company is sending additional US and Canadian production and technical service personnel to reinforce existing PHOS-CHEK Australia personnel currently providing airbase and equipment service operations. Since the start of the bushfire season the company has sent thousands of tons of fire retardant and Class A foam in support of firefighting activities. This past week, over 100 tons of fire retardant were delivered to Nellis AFB in Nevada where the product will be flown by military transport to Australia.

PHOS-CHEK Australia’s Equipment Service Center Operations provides equipment, field services and distribution of parts and supplies for fire suppression operations. The company also operates a fleet of mobile equipment capable of ground applying fire retardant.

According to Edward Goldberg, Perimeter Solutions CEO, “sending additional resources greatly increases our ability to supply our customers the products and services they need to accomplish their mission. Our goal is to help the Australian firefighting community save lives and protect property by delivering quality products and exceptional services.”

In August 2019, Perimeter Solutions and PHOS-CHEK Australia jointly held workshops to support the fire agencies, aircraft operators and timber companies in the use of aerial and ground applied LTR. The workshops were in response to abnormally large damaging bushfire frequency that both Tasmania and New Zealand experienced from 2016-2018.

Minnetonka Company Creates Fire Suppression Systems To Keep Buses Safer

MINNEAPOLIS (WCCO) — A local company is hoping the fire on a Richfield school bus Monday will bring up the issue of fire safety on school busses.

Video of the fire that broke out on a Richfield Middle School bus showed how quickly the vehicle became engulfed.

“My first reaction is it was preventable,” Fireaway, Inc. CEO Lance Harry said. “It’s fantastic no one was harmed.”

FIRE ALARM AND SAFETY

Fire alarm gives Parker teen the chance at a basketball shot of a lifetime

PARKER, Colo. — A fire alarm is usually the last thing that any sports team wants to happen in the middle of a game. But a basketball team in Parker instead used the chance delay to make the memory of a lifetime.

Last Friday, the Legend High School boys junior varsity basketball team was playing a game at Dakota Ridge High, when the fire alarm went off near the end of their game.

Surveillance Technology Creates Opportunities in Oil & Gas Market

The oil and gas market can require very specialized cameras in and around potentially hazardous areas. Many integrators may be familiar with explosion-proof cameras, but for those who are not, it is important to dispel a popular misconception from the onset: Explosion-proof cameras are designed to prevent an explosion, not to survive one.

These cameras are not tested or built to survive serious impacts; instead, the

Rosenbauer PANTHERs in Service at FL Airport

Two brand new Rosenbauer PANTHER 6x6 HRET were put into service on January 13, at Broward County’s Fort Lauderdale-Hollywood International Airport (FLL) in an event featuring a traditional push-back ceremony. In the future, these vehicles will act as the flagships of the airport fire brigade. The performance, safety, and ergonomics of the high-end devices exceed the requirements of the NFPA (National Fire Protection Association) and FAA (Federal Aviation Administration). This makes the PANTHER at FLL one of the best Aircraft Rescue and Fire Fighting (ARFF) vehicles in the world.

U.S. DOT interactive map encourages investment in underserved communities

The U.S. DOT has launched a new interactive map designed to highlight federal investment in major infrastructure projects located in and around underserved rural and urban communities. The detailed information about vital infrastructure resources located in and near these areas—dubbed "opportunity zones"—is intended to encourage further economic investment.

“Opportunity zones have the potential to increase job creation in underserved communities, especially in rural areas, and the department is working to ensure there are transportation links to opportunity zones,” U.S. Click here to read full article.

Concrete pavement replacement serves motorists well at key Florida intersection

The city of Avon Park in Florida—so named for Stratford-upon-Avon in the United Kingdom, which is otherwise known as the birthplace of William Shakespeare—is not only the oldest city in Highlands County, but is also home to one of the county’s busiest intersections.

That intersection would be none other than where S.R. 64 meets U.S. 27. The Florida DOT (FDOT) officially embarked on a mission to make upgrades to the intersection when construction began on the improvements

Who’s Watching Your Porch?

There’s always something happening on the porch.

In Massachusetts, a young man waits for his date at her doorstep while her father grills him. “Bye,” the daughter says as she leaves for the evening, adding an indignant “oh my God.”

In Killeen, Tex., two men, one of whom appears to be holding a gun, take turns launching themselves, feet first, against the front door.

Royal Caribbean says video shows grandfather knew window was open before dropping toddler

Royal Caribbean is seeking to dismiss a lawsuit over the death of 18-month-old Chloe Wiegand, who fell from an 11-story window aboard one of its ships in July. The cruise line said in a motion to dismiss that the actions of Chloe’s grandfather are "the sole reason why Chloe is no longer with her parents."

Chloe’s grandfather, Sam Anello, says he picked up his granddaughter and leaned her against what he believed to be a closed window. Royal Caribbean says in a motion to dismiss that CCTV footage shows Anello leaning out of the window before picking up Chloe.

PM: We Cannot Resolve Crime Without Looking At How We Resolve Conflict

Of the many facets of Saint Lucian life touched on by Prime Minister Allen Chastanet in his 2020 New Year’s speech on Sunday, crime and security perhaps tops the list in terms of importance. The arrest of a man in possession of an M4 at Morne Du Don, not to say the fatal shooting of Cassius Glasgow, served to underscore the prime minister’s concerns.

“We cannot and will not deny that the crime situation continues to affect us deeply,” he said Sunday. “We feel it every time a young person loses his or

Since the Institute was founded in 1961, more than 135,000 technicians and technologists have met NICET’s rigorous certification criteria, and the number grows rapidly as more employers and local and state governments rely on NICET certification to measure the qualifications of their workforce. The certificate and wallet card issued by NICET serve as a portable credential for certified technicians and technologists who seek to maximize their skills and knowledge and advance in their professions. By employing those workers who have demonstrated their technical mastery, employers can provide their customers higher quality goods and services. And, ultimately, the public enjoys a higher degree of safety and protection.
