

ASHS Horticulture Hall of Fame

In 1989, the ASHS Board of Directors approved the creation of the Horticulture Hall of Fame Award.

This prestigious premier award is to honor distinguished persons who have made extraordinary contributions to horticulture. Its purpose is to educate and inform younger members of the profession and the general public about the important contributions of horticultural pioneers who made significant impacts on horticulture and how their achievements contributed to the science and profession of horticulture and to the greater public good.

An individual Horticulture Hall of Fame Plaque inscribed with the name of the awardee and engraved likeness will be installed at ASHS Headquarters. A narrative (1000-2000 words) about the awardee's contributions and effect on horticulture will be published in HortScience.

1990	Gregor	(Johann)	Mendel
