

Distinguished Achievement Award for Ornamental Plant Breeding

Description:

Distinguished Achievement Awards are given to encourage and recognize outstanding achievement of a specialized nature consistent with the overall objectives of the Society. This award was established to recognize superior accomplishments in research related to ornamental plant breeding. The award is meant to honor all aspects of ornamental plant breeding and may include distinguished cultivar development and release, particular innovation in methodology or process, or outstanding scholarship that advanced the science of ornamental plant breeding.

Requirements:

To be eligible for the award, nominees must have been an ASHS Member for at least three years. Membership in the Ornamental Plant Breeding Professional Interest Group is not required. Previous award recipients are not eligible.

Instructions and requirements:

Individuals must be nominated by an ASHS Member.

Nominations must include brief biographical information, a curriculum vitae, and no more than five pages (total) describing the accomplishments or programs for which the individual is being nominated.

Two letters of reference are required.

Please send nominations and supporting materials to the current Chair of the Ornamental Plant Breeding Interest Group. The selection committee will be composed of the Current Chair, Immediate Past Chair, Chair Elect, and Secretary (if applicable).
