PROFESSIONAL INTEREST GROUPS

A. Formation and Organization of Professional Interest Groups

*Professional Interest Groups*—Professional Interest Groups are comprised of members sharing interests in special horticultural science areas or activities. Each Professional Interest Group shall be headed by a chair and chair-elect, elected by its members. A Professional Interest Group shall consist of a minimum of 20 members, and may be created by petition of 20 or more Society Members to a vice president, or directly by a vice president on approval of the Board of Directors.” (ASHS Bylaws, Art. VI, Sect. 2) The petition to the Board of Directors must include the following:

1) The name of the proposed Interest Group
2) A brief statement of objectives of the Interest Group
3) 20 signatures by ASHS members calling for creation of this Interest Group

The objectives of most ASHS Professional Interest Groups include the following:

- To promote interaction between and among the research, extension, teaching, and industry components of horticultural science;
- To provide a forum for the development, discussion, exchange, sharing, or dissemination of ideas, information, or materials via Workshops, Symposia, contributed paper sessions, discussion groups, business meetings, field trips, regional and national meetings;
- To educate the membership on important issues via articles, blogs, webinars, etc. (ASHS will assist in facilitating)
- To promote, encourage, facilitate, or coordinate basic and applied research and education by identifying critical needs, developing methods and procedures, or preparing proposals;
- To promote liaison or good working relationships with other organizations with similar interests;
- To educate the public
- To encourage recruitment of young scientists; and
- To recognize outstanding contributions.

The division vice presidents are urged to establish contacts with existing autonomous groups (such as various breeders groups) to invite them to hold some of their meetings in conjunction with annual or regional meetings of ASHS, thereby possibly leading to some form of affiliation with the Society under the Professional Interest Group concept, retaining the essentials of autonomy but resulting in an overall strengthening and unifying of horticulture and the Society.

B. Membership in Professional Interest Groups

Membership in Professional Interest Groups shall be largely voluntary, but may be supplemented by
appointees of the division vice president.

C. **Activities of Professional Interest Groups**

Required activities of a Professional Interest Group include: select a Professional Interest Group name and elect a chair; develop a brief statement of objectives; and be active and report annually on activities and plans to the division vice president. Each Professional Interest Group shall elect a chair-elect to provide a succession to the chair position. The chair of a Professional Interest Group may serve for more than one year at the discretion of the Professional Interest Group members.

Optional activities of a Professional Interest Group include: organize into subgroups; define responsibilities and decide on terms of office of officers; serve as a “think tank” in generating ideas for improving the Society’s effectiveness; prepare position papers, resolutions, and statements; organize proposals for colloquia, workshops, and meetings in conjunction with regional and/or annual conferences (all proposals will be evaluated and must be accepted for presentation); periodically compile and distribute a newsletter; and foster a broader base of communication/collaboration among scientists (including those outside ASHS) with similar interests. Each Interest Group can organize a session on any topic of interest to their members to present at the annual meeting. No proposal is necessary as long as all speakers are confirmed by the deadline.

Groups that sponsor an award or conference competition are responsible for all aspects of the award or competition, including publicizing the award or competition, providing the necessary judges or selection committee, and coordinating with ASHS headquarters on all deadlines. If a certificate or other award needs to be presented at the ASHS Annual Conference, all relevant information about the winner must be provided to ASHS Headquarters at least 5 weeks in advance of the start of the conference. ASHS headquarters does not participate in the criteria, selection or notification process for these awards.

Each Professional Interest Group will hold a business meeting at least once per year, online via ASHS Zoom or in-person at the ASHS Annual Conference. If a workshop proposal is submitted by a Professional Interest Group and is approved for presentation, the total time allotted for the workshop and an in-person Professional Interest Group business meeting shall not exceed two hours. Professional Interest Groups may have the last 30 minutes of the workshop slot scheduled for the annual business meeting.

Voluntary contributions to support Professional Interest Group activities shall be permitted in accordance with ASHS “Solicitations and Acceptance of Outside Funds” policy (BOD action, 12/15/92).

D. **Professional Interest Group Reports**

*(To be submitted annually by Professional Interest Group Chairs)*

A written report from Professional Interest Groups is required annually by September 1st (unless the ASHS Annual Conference is held after this date which would allow this date to be extended). The
report must be submitted via email to the ASHS Member Services Manager. This report should include any items for Board attention or action that occur during the business meeting. Newly elected officers, activities of the group during the past year, and specific concerns of Professional Interest Groups shall be conveyed to the Board of Directors in the annual reports. ASHS maintains the past several years of reports on the ASHS site.

Perhaps the most important factor contributing to the success of any organization is effective communication among its various components. The report submitted by the Professional Interest Group Chair is essential for ASHS to effectively serve the needs of the group membership. ASHS Policy requires the reports to be submitted yearly in order for the group to remain in “good standing”. Please remember that only workshop proposals from Professional Interest groups in “good standing” will be considered for the Annual Conference.

E. Termination of Professional Interest Groups

“Professional Interest Groups that fail to serve a meaningful purpose may be discontinued by the division vice president with the approval of the Board of Directors.” (ASHS Bylaws, Art. VI, Sect. 2)

A Professional Interest Group will be terminated by the division vice president with approval of the Board of Directors for any one of the following reasons: a) recommendation of the Professional Interest Group; b) lack of significant activity by the Professional Interest Group; c) failure to submit the required annual report; and d) fewer than 20 active participants.

GUIDELINES FOR ASHS WORKSHOPS

- Each ASHS Professional Interest Group is allowed (not required) to submit one (1), two-hour workshop proposal for presentation at the Annual Conference. Eight workshops will be approved by the ASHS Board of Directors for presentation during the conference. For those groups that are selected to present their proposed workshops, the Group Business meeting may be (but does not have to be) incorporated at the end of the workshop. The time allocated to the workshop (including incorporated Business Meeting if requested) will be 2 hours.

- Workshop proposals may be developed by one or more ASHS Groups or Committees. Individuals or special interest groups shall work through an established Group or Committee if they wish to develop or suggest a workshop. However, only one Professional Interest Group can be designated as the workshop proposal primary sponsor. Additional Professional Interest Groups can be listed as secondary sponsors but only the primary sponsor will have the group's business meeting incorporated into the session's assigned time. A Professional Interest Group can only be a sponsor (primary or secondary) on one workshop proposal. (Thus, a group cannot submit a workshop proposal and be listed as a secondary sponsor on another proposal. A group also cannot be a secondary sponsor or more than one workshop proposal.)
• Proposals are to be submitted by a designated workshop coordinator. The coordinator will be the main contact for the Headquarters staff on workshop related matters (including the workshop acceptance notification). The coordinator designates the workshop moderator and speakers and is responsible for all submissions related to individual presentation summaries.

• A workshop should be interactive and emphasize participation and group discussion, often with problem-solving or hands-on efforts. We encourage those submitting proposals to fully develop the ideas and plan the sessions. Developing a proposal completely will allow for the most thorough evaluation. Workshops are not designed to be content directed from a speaker to the audience only. Please do not propose a series of speakers each giving long presentations without any time for discussions, questions or opportunities for audience interactions. Q&As do not count as interactive presentation format.

• It is important to focus on elaborating on the topic, relevance/impact of the topic, a detailed description of the planned format for the workshop, an overview of the goal of the workshop, confirmed speakers/panel participants and the importance of their perspective on the topic. Because only eight workshops will be selected for presentation, it is encouraged to be as detailed as possible. Abstracts are not accepted for workshops. A short (100 words) summary of the presentation topic can be submitted for each workshop speaker in the workshop proposal, but they are not required (the details related to the importance of the speaker’s role/perspective are the areas that are most important).

• Each approved Interactive Workshop will be allowed up-to three (3) non-member invited participants* (Non-Member Invited Speakers) with registration waivers BUT these invited participants must confirm acceptance of the invitation in writing BEFORE the Interactive Workshop proposal is submitted. The Non-Member Invited Speakers’ registration fee is waived for the entire conference. However, they still need to be registered in advance by the workshop coordinator. Please contact Negar Mahdavian to make arrangements for the registration of non-member invited speakers.

• The Technical Program Committee will evaluate and approve the workshops for presentation. Additional opportunities to revise proposals will not be provided. Any workshops that are proposed and then turned down will be automatically accepted as Professional Interest Group Sessions.

See https://ashs.org/page/WorkshopOrganizers for additional information on Workshops.

*Non-Member Invited Speakers

If at any time the person has been an ASHS Active Member within the last five calendar years (for the purposes of the 2024 Conference, if he or she was a member between 2018 and 2023), then the person is not eligible to receive complimentary registration as a non-member invited speaker to a workshop or symposium.

GUIDELINES FOR PROFESSIONAL INTEREST GROUP SESSIONS
• If your Professional Interest Group feels strongly that they do not want to follow the workshop structure as detailed above, there is an opportunity to organize a Professional Interest Group Session.

• Each Interest Group can organize one two-hour Sessions on a subject of interest to their members.

• There are no specific requirements for this type of session. Submissions must be made online by the deadline. Acceptance is automatic. No extension will be granted.

• All sessions will be 2 hours (or less if requested) in length.

• There are no restrictions on format.

• There are no registration fee waivers for any speakers for this type of session. All speakers, regardless of their membership status will have to register and pay the registration fee. If speakers are non-members, they will have to pay the non-member rate. ASHS encourages groups to invite members of their groups to speak in these types of sessions.

• An Interest Group may have both an Interactive Workshop and a Professional Interest Group Session presented during the ASHS conference.

• Like all other session types, this will be an in-person session only. Therefore, all speakers participating must register and attend the ASHS Annual Conference in person.

All workshop and session speakers must be registered for the conference by the published deadline. ASHS members must register and pay in full the appropriate registration fees. Refer to https://ashs.org/page/ASHSAnnualConference for details.

PROFESSIONAL INTEREST GROUP ANNUAL BUSINESS MEETINGS

Each Professional Interest Group will hold a business meeting at least once per year, online or in-person at the ASHS Annual Conference. To schedule an in-person meeting at the ASHS Annual Conference submit the https://ashs.org/page/OnsiteMeetingRequest. To schedule an online meeting via ASHS Zoom please contact Sara Powell. Groups may also choose to conduct additional communications and discussions throughout the year through the ASHS Group Online Communities on the ASHS website and via online meetings.

After the Conference:

Submitting Workshop Papers from ASHS Conferences for Publication

Workshop manuscripts may be published in the subject-appropriate ASHS serial publication (HortScience or HortTechnology) within one year following the presentation as part of a proceedings, subject to acceptability. The manuscripts will be peer-reviewed and must meet the same standards as
any published manuscript. Organizers of the workshop proceedings are invited to write a brief introduction (one published page maximum). The workshop organizer is responsible for ensuring that all workshop participants submit their manuscripts to the ASHS Online Peer Review System within 6 months of the occurrence of the workshop. Publication costs shall not be borne by the Society (i.e., the papers shall be subject to publishing fees). Additional information is available here https://cdn.ymaws.com/ashs.org/resource/resmgr/publications/Workshops_and_Special_Topics.pdf

SOLICITATION AND ACCEPTANCE OF OUTSIDE FUNDS BY ASHS GROUPS: A STATEMENT OF POLICY

ASHS Groups are encouraged to originate and develop projects and activities to promote the purposes of the Society. These projects may need outside support. The following guidelines govern the solicitation and acceptance of funds from outside courses:

- The term “groups” includes all official Professional Interest Groups, Committees (including the Scholarship Award Committee), Regional Groups, Divisions, the Association of Collegiate Branches, and all other units within ASHS, with the exception of the Endowment Fund Committee.
- “Solicitation” and “acceptance” of funds means for the use of a specific group and not the general use of ASHS.
- “Funds” includes all gifts, donations, grants, and subsidies.
- No group will solicit or accept funds except as specified in these guidelines.
- Before any solicitation or acceptance of funds, the group will notify the ASHS Headquarters Staff in writing, outlining the purpose of the solicitation, the persons or firms to be solicited the projected income, the use of the funds, a detailed budget including all expenses (direct and indirect), and a time schedule for the project or activity. The Chief Administrative Officer will, within 30 days of receipt, either approve or disapprove the proposal in writing. The detailed budget may be amended from time to time; no expenditure will be incurred or made except as provided in the budget.
- The Chief Administrative Officer will consult with the Executive Committee before disapproving any proposal.
- Purposes of the activity to be funded will be restricted to those which ASHS is uniquely or exceptionally qualified to conduct because of its focus and composition as a professional society in horticultural science. Purposes encouraged include (but are not limited to): 1) sponsoring Colloquia, Short Courses, and Workshops; 2) publishing scholarly works from group activities; 3) speaker travel expenses and honoraria; 4) publishing and mailing of newsletters and notices of activities, and 5) support for new ventures not fully funded by the Society.
- Purposes scrutinized by the Chief Administrative Officer include (but are not limited to): 1) grants from organizations that might reflect adversely on ASHS objectives; 2) grants that are so large or whose purposes are so extensive as to be impractical in administration; and 3) grants for purposes or activities that are beyond ASHS purposes. No grant will be solicited from a
profit organization to perform research and/or service in an area peculiar to the interest of the granting organization.

- ASHS Headquarters is responsible for administering all funds, including disbursements. All donations, grants, and gifts will be to the “American Society for Horticultural Science” and not to the individual group. All earmarked funds will be deposited by the group in the Society’s general fund, with interest accrued to the Society. The current group chair will make written withdrawal requests to the Chief Administrative Officer.

- Groups should not compete with the solicitation activities of the Endowment Fund Committee or other ASHS groups. The Chief Administrative Officer will consult with the Chair of the Endowment Fund Committee before approving the solicitation of funds from any persons or organizations that might be pending Fund donors. The Chief Administrative Officer will work with groups to eliminate duplicate solicitation. The basis for decisions will include time schedule, amount to be solicited, potential success, and details of the organization division/department to be contacted.

- A written agreement must be submitted to the Chief Administrative Officer if any give, grant, or donation requires the group or ASHS staff to perform any service or activity. The agreement must be approved by the Chief Administrative Officer before execution by the group.

- All contracts and grants will be carried out on a full-cost recovery basis; i.e., all expenses (direct and indirect) must be recovered by the contract or grant. ASHS will not commit additional funds for cost-sharing grants except under unusual circumstances, and then only the Executive Committee approved.

- No grantor or other person or organization making a grant to a group may use the name “American Society for Horticultural Science” or “ASHS” in any advertisement, announcement, or other pretend matter or in any radio or television advertisement or announcement without prior ASHS written consent.

- Recognizing that funds are sometimes given with other than a pro-bono publico spirit, groups should be careful to avoid circumstances where the donor might wish to imply an endorsement by ASHS.

- Funds received for a group will not be used for the personal benefit of individual members, and all funds will be used in a manner consistent with the purposes of the American Society for Horticultural Science as stated in Article I of its Bylaws.

- Recognizing that grants of large sums present different problems from a gift of a few dollars, the Chief Administrative Officer at the direction of the Executive Committee may require additional information or may place restrictions on the use of funds, not expressly stated.

- Before the ASHS Annual Conference, a copy of this statement of policy will be sent to all present and incoming members of the Board of Directors, and chairs and chairs-elect of Committees and Professional Interest Groups. In addition, this statement of policy will appear on the agenda of the meetings of the Endowment Fund Committee, Scholarship Awards Committee, Division Officers, Education Planning Committee, and Professional Interest Group Chairs & Chairs-elect.
Professional Interest Groups—Statements of Purpose

Administrators (ADM) - To provide a forum for department and government administrators to meet to consider and discuss common problems and responsibilities and to share ideas that may enhance administrative abilities.

Asian Horticulture Group (AH) - To promote dialogue and information and germplasm exchanges between horticulturists residing in America and Asia and to assist them in developing horticultural education, research, and extension programs to better preserve and utilize their rich horticultural resources.

Association of Horticulturists of Indian Subcontinent (AHIS) - To promote fellowship among the horticultural scientists of Indian origin and increase professional opportunities through increased interaction among them and with other American scientists; promote awareness of ASHS membership benefits and encourage membership pool from India; facilitate and support ASHS ad-hoc membership to attract Indian Horticulturists; to act as scientific ambassadors to facilitate an exchange of scientific information and cultural ideas between India and countries in North America; help share and transfer results of scientific research to India to improve agricultural productivity and quality.

BioEnergy and Co-Products (BioECP) - To provide a platform to promote and expand the expertise and technologies of horticulture to bioenergy crops, to explore and foster bioenergy co-products for horticultural crops production, and to share and disseminate information related to bioenergy and co-products research to a larger audience.

Citrus Crops (CITR) - To provide a forum for exchange of ideas between the various specialists in citrus research and citrus extension personnel.

Commercial Horticulture (CHEX)—To increase ASHS membership and meeting participation of horticultural extension specialists working with industry and/or community groups, to foster communications between such specialists, and to share ideas and methods for working with growers and commodity groups.

Consumer Horticulture and Master Gardeners (CHMG)—To become familiar with cooperative extension home horticulture programs within the United States, to identify and develop the ability to respond to home horticulture information needs, and to improve methods of information delivery to home horticulture audiences.

Ecological Physiology (EcolPhys) - To promote basic and applied research on the physiology of horticultural crops with primary emphasis on crop physiological responses to environmental stresses, specifically including temperature, water, and air pollution stresses.

Emeriti (EMER) - To provide a forum for retired horticulturists where some issues of concern to ASHS can be defined, analyzed, and acted on; to establish a registry of retired horticulturists; and to identify
an accessible reservoir of research, extension, and teaching talent that may be called on for help and guidance.

Federal Partners (FP) - To provide a network for horticultural professionals who work for national, federal, state, and local governments. To provide linkages to university and industry colleagues to promote exchange of ideas, common research goals, and multilevel approaches to large and/or complex issues affecting horticulture and food security.

Floriculture (FLOR) - To identify problem areas (and propose approaches to resolving them), to develop higher standards of quality, and to share information about activities occurring in floriculture research, education, and extension.

Fruit Breeding (FRBR) - To promote and coordinate research efforts in the genetics and breeding of fruit crops.

Genetics and Germplasm (GG) - To provide a forum for plant breeders, geneticists, botanists, general horticulturists, and others interested in collecting, preserving, evaluating, distributing, and/or using germplasm in or for research or teaching programs.

Graduate Student (GRAD) - To provide a formal organization for Graduate Students in ASHS to support programs and issues facing Graduate Students in Horticulture.

Growth Chambers and Controlled Environments (CE) - To provide leadership for horticulturists in the use of growth chambers and controlled environments and to provide a means for cooperative research and teaching among those using or interested in such facilities in their programs.

Hemp Research and Extension (HEMP) - To unify hemp research and extension with students and faculty across the nation. This group will provide a forum to share recent advances, challenges, and future directions in the research and outreach of this widely expanding crop. This PIG will create a core group of multi-state collaborators that can be leveraged to secure federal funding for hemp research.

Herbs, Spices, and Medicinal Plants (HSMP) - To promote and encourage scientific research and education on herbs, spices, and medicinal plants, emphasizing botanical, cultural, environmental, genetic, harvesting, physiochemical, processing, and pharmacological aspects of these plants.

History of Horticultural Science (HIST) - To exchange information and promote interest in the history of horticultural technology and science.

Hort Industry - to be a focal point for creating ASHS Workshops and Programs for the annual ASHS meeting and to foster collaboration between industry, academia, government and non-profit organizations. Additionally the group will work on promoting industry within ASHS, and ASHS within industry professionals.

Horticultural Plant Reproductive Biology (HPRB) formerly Seed and Stand Establishment - To establish a
network for scientists and growers to identify issues related to reproductive biology and develop practical solutions.

Human Issues in Horticulture (HIH) - To stimulate discussion among those engaged in research and education programs in areas of horticulture that interact with the social sciences, such as economics, psychology, education, various forms of therapy, urban and rural sociology, and urban and rural development.

Intellectual Property Rights (IPR) - To provide a forum that will promote the exchange of information and discussion of issues concerning the protection of intellectual properties.

International Horticultural Consultants (ICON) - To discuss the credentials and accreditation of international consultants and sources of information, backstopping, teamwork, training, experience, and communications necessary for effective employment as an international consultant in either the private or public sector, and to develop a directory of international horticultural consultants in ASHS and their sources of information.

International Horticultural Issues & Networking (IHIN) - To provide a forum for the exploration, discussion, and exchange of information on global issues of vital concern to horticulturists in all divisions and disciplines; to provide a potential mechanism through concerted action for input into decision and policy making processes at the national and international levels.

Invasive Plants Research (INPR) - To communicate research ideas, techniques, and methods on the identification, study, and control of invasive plants in cross-commodity horticulture production and in urban and rural lands; and the assessment of exotic plants for potential invasiveness.

Latin America (LATIN) - To promote interaction and collaboration between and among ASHS members involved in research, extension, teaching, and industry components of the horticulture sector in Latin America.

Local Food Systems (LOCSY) - To promote academic and research information exchange on scientific development, scholarship, and educational activities related to and regarding local and regional production systems, including definition and measurement of food systems, foodsheds, small and mid-scale production systems, beginning/new farmers, local farmers and farmers markets, farmers expanding from direct sale to local/regional wholesale, scale neutral technologies, agriculture at the urban/rural interface, urban horticulture production (community gardens, school gardens, home gardens), farm-to-consumer marketing, farmer-to-institution /school marketing, local food system and farmland policy, and relationships of local horticulture to rural and urban communities and economies.

Marketing and Economics (MKEC) - To bring together workers having horticultural and economic interests in the marketing of horticultural crops and to expand markets and improve marketing techniques for horticultural crops.

Nursery Crops (NUR) - To identify those conducting nursery crop research and to ascertain the scope
and direction of their studies, to develop and share information for teaching nursery management and production courses, and to provide staff development opportunities for nursery crop specialists, teachers, and researchers by developing information programs and interacting with the nursery industry and profession.

Orchid (ORCH) - To provide a platform for promoting fellowship, expand the opportunities, exchange ideas, and share information about activities occurring in orchid research, education, and extension.

Organic Horticulture (ORGH) - To stimulate discussion on horticultural research techniques that enable growers to produce horticultural crops according to organic standards, and on the processes that make organic production systems function.

Ornamental Plant Breeding (OPB) - To promote ornamental plant breeding, to serve as a forum for exchange of information among breeders, and to coordinate the communication of results to industry and academe.

Ornamentals/Landscape and Turf (O/LT) - To study woody (ornamental and native) herbaceous and turf materials with emphasis on plant adaptability, selection, and maintenance requirements and to provide a vehicle for arboreta, botanic gardens, and the landscape industry (architects and contractors) to become more closely allied to ASHS.

Plant Biotechnology (BTCH) - To communicate research ideas, techniques, and progress on the emerging techniques in micropropagation, cell selection, protoplast culture, embryo culture, haploidy, gene transfer, and molecular biology as they relate to horticultural crop improvement; and to encourage collaboration among researchers in the fields of plant genetics, germplasm and breeding, stress physiology, tissue culture, growth regulator research, and plant growth and development on problems of concern in improvement and propagation of horticultural crops.

Plant Growth Regulation (PGR) - To foster excellence in plant growth regulator research, to help and encourage new research talent in plant growth regulators, to unify research and industry workers in an attempt to solve horticultural problems related to plant growth regulator research between ASHS and other related organizations.

Plant Nutrient Management (PNM) - To exchange ideas and information on mineral nutrition and to provide interaction between industry and public institutions interested in mineral nutrition of horticultural crops.

Plasticulture (PLAST) - Heightened environmental awareness and recent advances in plasticulture technology are catalyzing all kinds of new approaches in horticultural production around the world. The purpose of the Professional Interest Group is to encourage and facilitate the mutual exchange of ideas and information concerning the use of plastics in various aspects of horticultural research, extension, education, and industry. This is accomplished by promoting plastics science and technology, by providing a forum for the exchange of plasticulture ideas and information, and by encouraging innovation.
Pomology (POM) - To assist the planning and development of research, extension, and teaching programs in pomology and to serve the current and future needs of the fruit industry.

Postharvest (PH) - To exchange ideas and information relating to postharvest biology and technology of horticultural crops, to increase the awareness among other researchers, research administrators, legislators, and the public of the importance of the postharvest aspects of horticulture to the physical, economic, and psychological well-being of the population, and to integrate activities with those of associated Professional Interest Groups.

Produce Quality, Safety, and Health Properties (QUAL) - To promote more creative research, teaching, and industry liaison among horticulturists and food scientists.

Propagation (PROP) - To exchange ideas and information on propagation of horticultural crops and to provide interaction between industry and public institutions interested in propagation of horticultural crops.

Teaching Methods (TCHG) - To provide information and an area of interaction among educators at all levels and extension personnel interested in teaching, with emphasis on teaching procedures, effective use of photographic equipment and materials, and lists of source materials.

Technology Applications in Horticulture (TECH) - To serve as a platform for sharing information about technology that is being used and developed in all areas of horticulture.

Temperate Tree Nut Crops (NUTS) - To bridge the wide communications gap among nut tree researchers, to exchange ideas, results, and experiences in similar orchard crops, and to provide a forum to discuss various aspects of research unique to tree nut crops.

Tropical Horticultural Crops (TROP) - To discuss the culture, postharvest physiology, and processing of tropical fruits, vegetables, herbs, spices, condiments, pharmaceuticals, flavors, fragrances, latex, nuts, oils, beverages, and underutilized horticultural plants.

Undergraduate Student (UG) - To foster collegiality among undergraduate students in horticultural sciences.
Vegetable Breeding (VGBR) - To promote the exchange of information on breeding procedures, screening techniques, and other areas of specific interest to vegetable breeders, to encourage the exchange of germplasm among vegetable breeders, and to maintain current lists of vegetable variety names and descriptions.

Vegetable Crops Management (VCM) - To promote research and extension of a systems approach to production and utilization of vegetables.

Viticulture and Small Fruits (VSF) - To study the improvement, production, propagation, and culture of small fruit and grape crops, to perform services for the Society and the general public in the area of small fruits and grapes, and to exchange current information on recent research findings and educational and industry problems.

Water Utilization and Management (WUM) - To gather and disseminate information on water conservation, crop water requirements, irrigation methods, and efficient and effective water management.

Weed Control and Pest Management (WCPM) - To share new ideas and other research information concerning pest control in the varied areas of horticultural crop production.

AWARDS

Below is a list of Awards given by the Society and its various components. All specifications and online nomination forms are available on the ASHS website https://ashs.org/page/AwardsNominations.

Professional Career Awards

- **Hall of Fame** - this prestigious premier award is to honor distinguished persons who have made extraordinary contributions to horticulture. Its purpose is to educate and inform younger members of the profession and the general public about the important contributions of horticultural pioneers who made significant impacts on horticulture and how their achievements contributed to the science and profession of horticulture and to the greater public good.

- **Fellows** - Election as a Fellow of the Society is the highest honor that ASHS can bestow on its members, in recognition of truly outstanding contributions to horticulture and the Society.

- **Outstanding Extension Educator** - The ASHS Outstanding Extension Educator Award recognizes an educator who has made an outstanding and valuable contribution to horticultural science extension education for a period of 10 or more years.

- **Outstanding Graduate Educator** - The ASHS Outstanding Graduate Educator Award recognizes an educator who has had a distinguished and outstanding graduate education teaching career in horticultural science for a period of 10 or more years.
• **Outstanding Industry Scientist** - The ASHS Outstanding Industry Scientist Award recognizes a horticultural crops scientist working in the private sector who has made outstanding and valuable contributions to horticultural science, the horticultural industry, and the horticultural profession for a period of 10 or more years.

• **Outstanding International Horticulturist** - The ASHS Outstanding International Horticulturist Award recognizes an international horticulturist who has made an outstanding and valuable contribution to international horticultural science, education, research and/or outreach for a period of 10 or more years.

• **Outstanding Researcher** - The ASHS Outstanding Researcher Award recognizes a horticultural crops scientist who has had an outstanding record in research on one or more horticultural crops and in one or more areas of horticultural research for a period of 10 or more years.

• **Outstanding Undergraduate Educator** - The ASHS Outstanding Undergraduate Educator Award recognizes an educator who has had a distinguished and outstanding undergraduate teaching career in horticultural science for a period of 10 or more years.

• **Outstanding Leadership and Administration** - The ASHS Outstanding Leadership and Administration Award recognizes sustained outstanding and effective leadership and administration contributing to the progress of professional horticulture and having impact at the regional or national level for a period of 10 or more years.

• **Professional Early Career** - The ASHS Professional Early Career Award recognizes ASHS members for outstanding contributions to horticultural science through their professional activities within 7 years of completing their final degrees (BS, MS, PhD, etc.) prior to their employment.

**Professional Achievement Awards**

• **Outstanding Membership Recruitment Award** – The ASHS Outstanding membership Recruitment Award recognizes the active ASHS member who has successfully recruited the most new members in a calendar year.

• **The ASHS Esmaeil and Bahar Fallahi Award for Integrity and Professionalism** - This award recognizes professional horticulturists of any discipline and form of employment (academic, research, teaching, consulting, outreach, and extension, administrative, and commercial/industrial) who have demonstrated the highest level of a horticulturist in service to others.

• **ASHS Outstanding Undergraduate Mentor** - The ASHS Outstanding Undergraduate Mentor Award recognizes and rewards excellence, innovation, and effectiveness in formal faculty mentoring/advising of undergraduate students. This award is meant to recognize work with a broader population of students and less self-selected than students enrolled in the nominee’s classes. Examples include but are not limited to service as undergraduate or experiential learning coordinator in a department; service as a club or student organization advisor; mentor
for undergraduate research; or mentoring/coaching of an undergraduate team competing at the state, regional, or national level.

- **Outstanding Peer Reviewer Award**

### Student Awards

- **ASHS Industry Division Student Travel Grant** - This award is open to all undergraduate and graduate horticulture students who plan to attend the ASHS Annual Conference. *(This award is funded and managed by the Industry Division. ASHS headquarters does not participate in the criteria, selection or notification process for these awards.)*

- **ASHS Annual Conference Travel Grant** - A limited number of travel grants will be awarded to graduate and undergraduate students attending the ASHS Annual Conference.

- **ASHS Scholars Award** - the purpose of this award is to recognize and support scholastic achievement and to encourage career development in horticultural science at the undergraduate level.

- **ASHS Graduate Student Scholars Award** - the purpose of this award is to recognize and support exceptional achievement at the graduate level and to encourage career development in horticultural science professions.

- **Collegiate Scholars Award** - This award honors the academic achievements of junior and senior undergraduates from departments of horticulture, or of plant and crop science, who are majoring in horticulture.

- **Outstanding Undergraduate Horticulture Student** - The ASHS Outstanding Horticulture Student Awards officially recognizes exceptional undergraduate horticulture students in baccalaureate programs.

- **Outstanding Graduate Horticulture Student** - The ASHS Outstanding Graduate Horticulture Student Award officially recognizes outstanding graduate students at the Masters or Doctoral level in horticulture.

### Publication Awards

- **Cross-Commodity Publication Award**

- **Education Publication Award**

- **Extension Publication Award**

- **Fruit Publication Award**

- **Ornamentals Publication Award**
• Vegetable Publication Award

HortLandmarks

• This award is designed to commemorate sites of horticultural accomplishment. The designees are selected for historical, scientific, environmental, and aesthetic value.

Division Awards and Competitions—all facets of these awards are developed and carried out by the group that is mentioned in the award description. ASHS headquarters does not participate in the criteria, selection or notification process for these awards.

• Commercial Horticulture Distinguished Achievement Award (CHEX)
• Consumer Horticulture and Master Gardener Distinguished Achievement Award (CHMG)
• Distinguished Achievement Awards for Nursery Crops
• Extension Division Education Materials Award
• Floriculture and Cornell University Kenneth Post Distiniguished Achievement Award
• Floriculture Oral Competition
• Outstanding Fruit Cultivar Award
• Growth Chambers and Controlled Environments Oral Competition
• Distinguished Achievement Award for Human Issues in Horticulture
• Industry Distinguished Achievement Award
• Ornamental Plant Breeding Distinguished Achievement Award
• Ornamental Plant Breeding Oral Competition for Graduate Students
• Plant Growth Regulation Oral Competition
• Vegetable Breeding Group Award of Excellence

Professional Travel Award

• Miklos Faust International Travel Award
