

Mundt to Receive 2015 BSA Leadership Award

BALTIMORE, MARYLAND (May 21, 2015) – The Business Solutions Association (BSA) named M.C. Bud Mundt, the retiring Executive Director of the American Office Products Distributors (AOPD), as the recipient of this year's Business Solutions Association Leadership Award.

"Bud is clearly a leader in our industry," said BSA President Jim O'Brien, S.P. Richards Co. "Not only is he respected for his professionalism and his leadership qualities, he is a longtime advocate and friend to the business products community."

Mundt's career in the industry has spanned more than 46 years, beginning with his role at 3M in Los Angeles in 1969. He held various executive management positions within 3M's office products division for 21 years before transitioning to the dealer side of the industry in 1990 when he began working for Millers Business Systems in Dallas. While with Millers, Mundt served as Vice President of Sales for eight years.

In 1999, he began his own consulting business for independent dealers before deciding to return to a corporate position with AOPD in 2004. Mundt served as the company's full-time Executive Director and greatly enjoyed his role overseeing the world's largest network distributor of office products. Under Mundt's direction, the company grew to include 81 dealers and affiliates with 179 locations throughout the United States, Canada and Australia. The company's sole purpose is the development and implementation of regional, national and international office product programs.

Mundt will receive the award at the special Awards Dinner on Thurs., Oct. 1 during the 2015 BSA Forum, which takes place Sept. 30 – Oct. 1 at the Loews Atlanta Hotel in Atlanta, Georgia. Nominated individuals must display dedication and longevity to the industry, business acumen, forthrightness and integrity while having a cooperative spirit.

The BSA Awards Dinner is included in the full registration for the 2015 Forum. For more information, contact BSA headquarters or visit [here](#).
