

UCSF Centre for Evidence-based Patient Care Quality Improvement -- A JBI Affiliated Centre

Joanna Briggs Institute Comprehensive Systematic Review Training (CSR) Program

The UCSF JBI Centre is committed to advancing patient care excellence by teaching JBI comprehensive systematic review methods to learners who then transform a particular clinical problem/interest into the catalyst for a systematic review that can be published by JBI and used to support global efforts to improve healthcare and patient outcomes.

MODULE 1 — 14.5CEs BRN11632
Introduction to Evidence-based Health Care and the Systematic Review of Evidence

Please note Module 1 is a prerequisite for all other JBI Modules.

MODULE 2 — 19.75 CE
Systematic Review of Quantitative Data from Experimental, Non-experimental, Diagnostic and Prognostic Studies

MODULE 3 — 19.75 CE
The Appraisal, Extraction and Pooling of Qualitative Data

Plan NOW to attend one of our upcoming CSR Programs to begin your quest to conduct a systematic review geared to improve patient care:

May 20 to 24, 2013

July 29-Aug 2, 2013

Nov 4-8, 2013

Jan 20-24, 2014

Classes will be limited to 15 students per class. Registration is confirmed upon receipt of payment, on a first come, first served basis. Registrants are asked to affirm their commitment to complete required learning activities prior to each workshop and that they have access to a personal laptop to use in preparing for and completing the workshop. It is expected and hoped, but not mandated, that workshop participants will apply learning from this JBI CSR program in performing clinically focused systematic reviews that are published through JBI and contribute to advancing improvement in patient care quality, safety, outcomes and costs.
