CANADIAN HEALTHCARE CONSTRUCTION COURSE

1. Course Outline

1.1 CHES developed and offers the only course in Canada designed to meet the unique needs of healthcare construction professionals. Course sessions address information on contemporary issues related to construction and renovation within the Canadian healthcare environment. Key areas of study:

- 1.1.1 PDC Process
- 1.1.2 Building and Fire Codes
- 1.1.3 Infection Prevention & Control
- 1.1.4 Mechanical and Plumbing Systems
- 1.1.5 Medical Gas Systems
- 1.1.6 Electrical Systems
- 1.1.7 Emergency Preparedness
- 1.1.8 Sustainability
- 1.1.9 Safety & Security
- 1.1.10 Communications
- 1.1.11 Medical Technologies
- 1.1.12 Healthcare Facilities Planning
- 1.1.13 Commissioning

1.2 At the end of the program attendees receive a certificate of completion.

2. Procedure

- 2.1 Registration is offered online with both member and non-member rates.
- 2.2 Attendance is recorded by faculty each day based on the registration list
- 2.3 CHES national provides delegates with a survey to complete online upon course completion. Once submitted and attendance verified and registration paid, a certificate of completion is issued.
- 2.4 Faculty comments should there be a participant that should not receive a certificate of completion e.g., did not attend full course.
- 2.5 Certificate will have the date of the course and the message sent with the certificate will state that due to changes in healthcare and associate standards, the course will be refreshed approximately every three years.
- 2.6 There is no renewal process.
- 2.7 The CanHCC Committee and chapters will be responsible for marketing the course with assistance from the national office regarding messaging and design of communication.
