This document represents a 15-month calendar of activities for K-12 districts and schools to engage in to advance college and career readiness. The table provides a category into which each activity falls, describes the activity, and notes whether practitioners should be planning to take that action in the given month or actually engaging in that activity. Resources are attached as appropriate for each activity. This calendar focuses predominately (but not exclusively) on work done at the high school level with an acknowledgment that systemic change to a district’s postsecondary approach requires buy-in from the elementary and middle school levels.

This calendar is best utilized by a cross-functional college and career readiness team that engages district and school leadership, school counselors, teachers, parents, students, and, where possible, external groups like community-based organizations.

The National College Attainment Network (NCAN) encourages districts and schools to set college and career readiness goals on an annual basis. These goals help to solidify a vision for which practices and attitudes will change to improve students’ postsecondary outcomes. These will necessarily vary across organizations. These are some directions in which districts and schools might consider moving:

- Increase postsecondary enrollment (set specific targets)
- Increase Free Application for Federal Student Aid (FAFSA) completion (set specific targets)
- Increase college applications and acceptances (set specific targets)
- Include districtwide goals for college and career readiness in any version of school improvement plans
- Close equity gaps for students from low-income backgrounds, students of color, first-generation students, and other student groups underrepresented in postsecondary education
- Enhance external partnerships with and between the district and/or school with community-based organizations (CBOs) and institutions of higher education (IHEs)
- Assess and ensure ample staff and financial capacity are dedicated to college and career planning
- Incorporate fit and match concepts into postsecondary advising practices
- Harness the power of National Student Clearinghouse data to guide postsecondary advising
- Focus on guiding students to postsecondary pathways that data show are most likely to see them succeed
Four additional overview resources that will be particularly useful alongside this document and which should be consulted often are:

- **4 for the Fall: A Blueprint for Supporting the High School Class of 2021**: This NCAN resource offers clear, concrete ways to keep students on a postsecondary pathway after high school. Approaches covered include: understanding students’ postsecondary intentions through survey data, obtaining and analyzing postsecondary outcomes data from the National Student Clearinghouse, increasing access to financial aid by improving FAFSA completion rates, and examining current activities around fall milestones. While originally focused on the class of 2021, this guide is still relevant for supporting current seniors.

- **College Readiness Indicator Systems Resource Series**: The six-part series provides guidance to schools and districts for developing and enacting effective indicator and support systems. The resources are segmented by audience (e.g., district and school administrators, community-based organizations, policymakers). The authors, the Annenberg Institute for School Reform at Brown University, The John W. Gardner Center for Youth and Their Communities at the Stanford University Graduate School of Education, and the University of Chicago Consortium on Chicago School Research suggest that “readers may opt to review the whole series or select only those resources that apply to their particular role or interests.”

- **Postsecondary Advising: Characteristics and Conditions for Expanding Access**: Bellwether Education Partners’ publication “summarizes existing efforts and best practices in the college advising space. Informed by more than 60 discussions with districts, college access organizations, and funders, this comprehensive slide deck outlines conditions that must be in place to expand college advising services.” The resource includes three short tipsheets offering concrete recommendations to college access organizations, districts, and funders.

- **Preparing High School Students for Successful Transitions to Postsecondary Education and Employment**: This issue brief from MDRC reviews lessons from studies of selected policies and programs designed to improve students’ preparation for postsecondary pathways. Special emphasis is placed on ways to help those who traditionally face substantial barriers to success, including students from low-income backgrounds, African American and Latino students, and students with disabilities.
## ALL YEAR/ONGOING

## College/career readiness activities

**Function:**
Provide regular updates to district leadership for planning, implementation, and outcomes associated with CCR activities

**Resources:**
- Harnessing the Power of Postsecondary Data: Building a Student-Centered, Data-Driven Strategy (see "Evaluate Current Resources And Processes To Support Postsecondary Success")
- VDOE: Academic & Career Plan
- Helping Students Navigate the Path to College: What High Schools Can Do
- Culturally Relevant College and Career Readiness
- SY20-21 Continuous Improvement (CI) Guidebook: Collect Evidence Around Actual Implementation Chapter

## High-integrity/high-quality data levels

**Function:**
Maintain and monitor for a high-integrity/high-quality data level; secure buy-in for data input, security, and analysis that results in good, disaggregated data to drive decisions for college/career readiness

**Resources:**
- Principles and Practices for Getting Started With Data
- Roadmap for Tracking Your Student Results: Program Data & Systems
- Harnessing the Power of Postsecondary Data: Building a Student-Centered, Data-Driven Strategy (see "Set Goals And Monitor Progress")
- Strategic Use of Data Rubric

## College and career awareness/exploration opportunities

**Function:**
Offer a menu of college and career awareness/exploration activities at all grade levels

**Resources:**
- NASSP Online Professional Development: Module 3: Creating a College-Going Culture, Activity 6: College Readiness
- CollegeEd® College Planning Program
- ECMC Educator Resources
- KHEAA - College Circuit Guide
- KHEAA - Early Childhood Outreach and Activity Booklet
- KHEAA Outreach Presentation Guide (For all ages)

**COLLEGE:**
- NCAN: Early Awareness Middle Grades
- Connecting College and Career Success: Implementing and Managing Services for Students
- College and Career Awareness Activities for Elementary and Middle School Students
- Career Exploration in Middle School

**CAREER:**
- NCAN: Early Awareness Middle Grades
- Connecting College and Career Success: Implementing and Managing Services for Students
- College and Career Awareness Activities for Elementary and Middle School Students
- Career Exploration in Middle School

| Federal- and state-level data | Identify/access federal and state data sources for selected measures | • **SAIG Enrollment Application for State Grant Agencies** (e.g., Signing an agreement to receive student-level FAFSA completion data from Federal Student Aid through a state education agency. Processes for getting student-level data from state education agencies will vary across states.)  
• **SHEEO: Strong Foundations Survey Results**  
• **Education Commission of the States: 50-State Comparisons – High School Level** |
| Internal staff and budget resources for CCR activities | Identify staff and total budget capacity to support CCR activities for upcoming academic year | • **Postsecondary Advising: Characteristics and Conditions for Expanding Access** |
| Staff responsibilities and needed resources allocation | Assign staff responsible for activity implementation, data sharing, and communication.  
Allocate financial resources to individual activities (e.g., professional development content, student-facing materials, data sources, tracking systems, and reporting). | Given the highly variable nature of districts’ and schools’ financial and staffing situations, resources are difficult to identify. Users of this resource should work to find the staffing and budgetary solutions that best meet their own needs. It is important that the allocation match the district’s fiscal calendar and school board approval timeline; the school board may not vote on budget approval over the summer, in which case this activity’s timing would need to be adjusted. For specific questions or concerns, contact [ncan@ncan.org](mailto:ncan@ncan.org). |
| Student-level data management system to track key postsecondary milestones/outcomes | Adopt, enhance, or update student management tracking system; provide staff training for data input and reporting; create relevant user accounts and assess user permissions | • **Roadmap for Tracking Your Student Results: Program Data & Systems**
