

AMY LEITCH

SENIOR SUSTAINABILITY CONSULTANT – ARUP

Amy is a Senior Consultant with Arup's Integrated Planning team in New York, working with clients in the public, private and non-governmental sectors to provide strategic and technical advice that will influence the future development of cities, ensuring their livability, sustainability and resilience.

Amy leads the North American city engagement for the City Resilience Index on behalf of Arup and The Rockefeller Foundation, which is supporting 30 cities globally to operationalize the urban resilience agenda and enable them to measure and monitor the impact of their planning and investment programs. She brings extensive experience of global best practice through strategic development and delivery of the 100 Resilient Cities initiative, the Urban Sustainability Framework for the World Bank Global Platform for Sustainable Cities and work including co-development with C40 of the Climate Risk and Adaptation Framework and Taxonomy (CRAFT) on behalf of the Compact of Mayors with support by Bloomberg Philanthropies, and the C40 Paris-compliant Climate Action Plan Framework.

Amy has over 12 years' experience working as a sustainability and city resilience consultant on large-scale urban planning projects in North America, Europe, Asia, and Africa. She holds a Master's of Environmental Management from Duke University and is a LEED AP.
