

## Public Service Announcement

### 3D Vision

30 Seconds

#### **Do you have trouble enjoying 3D movies?**

3D viewing can be made difficult by a variety of vision disorders, even if you can see 20/20.

If you don't enjoy 3D as much as your friends do, or if you get headaches, dizzy or nauseous during or after watching a 3D movie, these are signs you may have a vision problem.

It doesn't matter how young or old you are, help is possible.

To find out more information about 3D vision, vision therapy and to find a doctor near you, visit: [covid.org](http://covid.org), the website for the College of Optometrists in Vision Development. That's [covid.org](http://covid.org).

The College of Optometrists in Vision Development is a non-profit 501(c)(3).  
We thank you for helping us with our mission of *"Improving lives by advancing excellence in optometric vision therapy through education and board certification."*
