

Pre-Conference Workshop Descriptions, CSAM 2019 Review Course

Title	Presenters	Time, 9/4/19	Description
Comprehensive Primary Care for Patients Who Use Drugs and Alcohol: A New Clinical Aid From CSAM	Paula Lum, MD, MPH, FASAM Veronika Mesheriakova, MD Mario San Bartolome, Jr., MD, MBA, MRO, FASAM Ingeborg Schafhalter-Zoppoth, MD, FACP Christine Soran, MD David Tian, MD, MPP Barry Zevin, MD	8:30-10:45 AM	The workshop is intended for primary care providers of all varieties (adults, pediatrics, OB, geriatrics) who seek to move beyond the treatment of substance use disorders to adapting primary care provision for patients who use drugs. Participants will be introduced to communication strategies for working with patients who use drugs and a decision support toolkit that is adaptable to the patient by type of drug used and route of use. The majority of the workshop will be spent utilizing the toolkit through interactive cases in small groups.
Fundamentals to Advanced Buprenorphine	David Kan, MD, DFASAM Joseph Mega, MD Matthew Torrington, MD, DFASAM Farah Zaidi, MD	8:30-10:45 AM	This workshop will focus on the modern prescribing of buprenorphine for opioid use disorder. Core topics of pharmacology, side effect management, and regulations of buprenorphine treatment will be covered in a flipped-learning format using an on-demand webinar participants will view in advance. The on-site workshop will take a case-based approach. Advances including patient selection, regulatory compliance, low-threshold treatment and new formulations of buprenorphine will move your practice into the state of the art.
Addiction Psychiatry for Addiction Medicine Providers	Michael Hoefler, MD Brian Hurley, MD, MBA, DFASAM Martin Leamon, MD	11:15 AM-1:30 PM	The workshop is a collaboration between the American Academy of Addiction Psychiatry (AAP) and California Society of Addiction Medicine (CSAM). The goal is to teach clinically relevant addiction psychiatry interventions to non-psychiatric addiction medicine providers. The workshop will include didactic information on psychopharmacology for individuals with co-occurring psychiatric and substance use disorder, breakout discussions of cases, and a Q&A session at the end of the workshop.

Board Exam Preparation Track	Mason Turner, MD, FASAM (co-chair) Chwen-Yuen Angie Chen, MD, FACP, FASAM (co-chair) Dustin DeYoung, MD Py Driscoll, MD Thomas Meeks, MD, FASAM Marie Mulligan, MD John Tsuang, MD	9/4/19: 2:15-6:15 PM *and also* 3 mornings: 9/5/19 7-8:00 AM 9/6/19 7-8:00 AM 9/7/19 7-8:00 AM	For those preparing for the Addiction Medicine Board exam in October 2019, this Board Exam Preparation is targeted study and practice. Participants receive exam preparation instructions, a handbook with and without answers provided during the Track, and a web-based self-assessment tool with 400 board-style questions including rationale/references for the correct answers.
Motivational Interviewing for Busy Clinicians	Kenneth Saffier, MD, FASAM Catalina Triana, MD	2:15-6:15 PM	This workshop will review and teach motivational interviewing (MI) tools for treating unhealthy alcohol and drug use and promoting behavior change in primary care specialties and other specialties. Emphasis will be on mentored small group learning, clinical skills acquisition, and practice. Participants will develop continuing learning plans to increase their proficiency.
What They Didn't Teach You in Medical Training: Protecting Your Medical License and Your Well-being	Kevin Cauley, JD Scott Clark, MPA Matthew Goldenberg, DO, FASAM Kimberly Kirchmeyer Karen Miotto, MD, DFASAM Lee Snook, Jr., MD, DFASAM	2:15-6:15 PM	This interactive session brings practical expertise from multiple disciplines, including physician wellness leaders, legal knowledge and updates from the Medical Board of California. This workshop focuses at both ends of the physician health spectrum; positive developments from the California Medical Association, a state-wide initiative to measure and address physician wellness and regulatory developments that have resulted in increased oversight of physician practice. Physician health leaders should be aware of the changes that are coming in this area, amidst the opioid epidemic and highly visible news of physicians who betrayed trust in the practice of medicine. The workshop will bring together physician leaders, wellbeing committee members and individual physicians who are seeking more clarification, guidance and best practices around issues pertaining to physician health and licensure.
