As a leading supplier of innovative boosting technologies, the world’s largest vehicle manufacturers rely on BorgWarner products for dynamic performance and reliability. Our technical expertise went into the design of the S410SX turbocharger—creating a unique blend of power and durability that others have yet to match.

Combined with a one-year, 100,000-mile warranty, we’ll help keep your equipment up and delivering the goods, day or night.

The Gaylord Texan Resort
Grapevine, Texas

Vision:
We, the membership of the Association of Diesel Specialists, see ourselves as the leading international organization of professionals that provides sales and expert service for yesterday's and tomorrow's diesel systems. Our goal is to be the complete resource for training, technical service information, member promotion and networking opportunities.

Our Association encourages participation at all levels of membership and is operated with the highest level of fiscal integrity. We embrace the economical, durable and clean diesel engine as one of the key elements for addressing global pollution and fossil fuel depletion.

Mission:
The mission of the Association is to provide programs and services to its members that will assist them in achieving success in the operation of their businesses in the diesel industry throughout the world.

Green Statement:
The Association of Diesel Specialists (ADS) believes in the future of clean diesel as part of an environmental solution to global greenhouse gas issues. ADS believes in the future of the inherently more efficient clean diesel power plant as a method of reducing our dependence on fossil fuels. ADS applauds the work of engine manufacturers in their efforts to continuously reduce emissions in diesel engines to near infinitesimal levels. ADS believes that the use of clean diesel will improve the sustainability of consumers, businesses and communities by reducing the environmental and societal cost of their activities.

ADS does not condone the use of devices made to intentionally contravene emission controls for use in equipment or vehicles used on a regular basis. ADS believes that intentionally bypassing or altering emission controls in the name of performance enhancement undermines individual and group efforts to promote the use of clean diesel as a viable alternative power plant for the future.

“Re-Invest in ADS” to “Better Together”

I recently returned from the 2019 ADS International Convention, which was a week filled with industry highlights, educational information, and exciting news all under one roof. The Rosen Shingle Creek Hotel in Orlando offered the perfect venue for our annual convention. The kick-off began on Monday with a “Hot” Golf Tournament hosted by our Replacement Parts Committee and Sponsored By: Goldfarb & Associates and BD Diesel Performance. What followed were two training schools, informative sessions, multiple networking events, and an exciting announcement. A big thank you to all those who contributed to the success of this ADS convention.

For those of you in attendance, you may have noticed a decline in our numbers. Unfortunately, due to many circumstances outside of our control, our attendance numbers have been trending down over the last few years.

Last year, the Executive Committee (the officers) were tasked by the ADS Board of Directors (your leadership) to research viable options. In our research, we found other associations struggled with the same decline in attendance. The outgrowth of their struggles became an event entitled, “HDAW”, better known as Heavy Duty Aftermarket Week. HDAW has many independent associations who come together annually to share knowledge, expertise and an exhibit area. ADS has decided to join forces with them at the HDAW convention and exhibit hall. The response from this announcement has been overwhelmingly positive and many expressed enthusiasm about the future of our convention.

So what does this mean for ADS? We are and will remain an independent association. In fact, we will continue to have our own mini convention prior to HDAW’s kick-off. For our membership, it will afford increased opportunities for exposure, diversification, reinvention, networking, and so much more. I truly believe this will be a win-win for all involved. There is one big difference - HDAW is held every January. I know this is short notice, but dust off those cowboy boots because the ADS convention is heading to Grapevine Texas in January 2020. Much more information will be coming in “Nozzle Chatter” and “News@ADS” so stay tuned. I look forward to seeing everyone in January and remember I am only a phone call away.

A New Opportunity for you and for ADS in 2020

As I write this article it has been less than a week since the end of the 2019 ADS Convention & Tradeshows. For those of you who attended "ADS" this year, I hope you agree with me that this was another good quality convention, no record attendance but still a quality show.

As most of you have already heard from ADS President Laura Rountree at our recent convention and from our press releases, the ADS Board of Directors made a major decision recently and one of largest changes to the association in many years, that of incorporating the ADS Tradeshow into HDAW, beginning in January of 2020.

For those of you who have attended the ADS conventions in recent years, you have probably noticed a reduction in attendees as well as a lesser support of exhibitors and or booth size in our tradeshow. We recognized this fact some time ago and I started our search for an organization to possibly partner with. ADS has been a sponsor organization since the initial HDAW in 2006 and as such I have been involved with HDAW for the past 13 years. As time has progressed, and through my involvement with the organization I had some exploratory talks with the folks at HDAW a year and a half ago to see if there was an interest in joining forces. At that time there wasn't the capability of integrating the two shows into one. However when HDAW made the decision to change locations to the Gaylord Hotel in Grapevine (Dallas), Texas, everything came into place and serious conversations started taking place. From the conversations it led to discussions as well as a contract to negotiate and as they say the rest is history.

With the move to the new location to Grapevine (Dallas), Texas for 2020, there is enough space for ADS Member Companies to exhibit and hold our meetings within the week of HDAW. ADS can also take advantage of the common elements of the education program, Product Expo, and industry-wide networking and dining events while preserving the member-specific elements of our annual ADS member meeting.

We at ADS are confident you will benefit from the new format which will include the most current and previous OEM companies that have supported ADS and many additional new companies. The NEW venue provides ADS with ample space to hold our membership meetings, including committee meetings, technical sessions, and seminars and then into the HDAW program for our members to improve and add diversity as well as new opportunities to grow your business.

Soon we will have additional information to share with you including a tentative agenda and many more details regarding this exclusive joint event. The slogan for our convention this year was "Reinvest in ADS," with this change I encourage you to Reinvest in ADS by attending the entire event as you will benefit greatly from the additional seminars and from the hundreds of products available to you in the joint tradeshow. Let’s make this show one of the best attended shows in recent times. Please join me January 26 – 30, 2020 in Grapevine, Texas.
Cummins Buying Fuel Cell Company
Continuing its determined expansion into non-engine power technologies, Cummins Inc. announced a definitive agreement to acquire, through a wholly-owned subsidiary, all the issued and outstanding shares of Canadian fuel cell systems specialist Hydrogenics Corp. The transaction is expected to close in the third quarter pending necessary approvals.

Based in Mississauga, Ontario, Canada, Hydrogenics is a global supplier of proton exchange membrane (PEM) and alkaline hydrogen fuel cell systems for industrial processes and fueling stations, hydrogen fuel cells for electric vehicles such as urban transit buses, commercial fleets, utility vehicles and electric lift trucks and utility-sized fuel cell installations for freestanding electrical power plants, critical power and UPS (uninterruptible power supply) systems.

Cummins Stage 5 Becomes Performance Series
Cummins announced that its Stage 5 diesels will now be called Performance Series engines. Available from 3.8 to 15 L and 100 hp to 675 hp (75 to 503 kW) they are especially applicable for construction, agriculture and material handing applications. It is unclear what the plans are for off-highway emission regulations beyond Stage 5. Cummins said the four-cylinder F3.8 and B4.5 Performance Series engines achieve increases in power and torque, providing users the potential to downsize.

The 3.8 L engine boasts a 33% increase from 130 hp (97 kW) to 173 hp (129 kW) with the new engine architecture, while the 4.5 L engine jumps 16% from 173 hp (129 kW) to 200 hp (149 kW). The F3.8 also incorporates the Cummins HPP (Hybrid Power Plug-in) concept as part of Cummins’ effort to offer full electric and diesel-electric solutions as part of a portfolio of power solutions.

The six-cylinder B6.7 Performance Series engine offers a 30% power increase over its predecessor with up to 326 hp (243 kW) and a peak torque of 1014 lb. ft. (1375 Nm). The L9 Performance Series engine increases power from 400 hp (298 kW) to 430 hp (321 kW), with a 13% increase in peak torque to 1361 lb. ft. (1846 Nm).

The integration of Cummins Stage 5 Single Module aftertreatment, which combines a diesel particulate filter (DPF) and SCR system into a single compact package, combined with integral combustion and air handling technology has allowed the F3.8, B4.5, B6.7 and L9 engines to operate without an EGR system. The no-EGR design means the same Cummins engine platform can be applicable for sales to multiple emissions standards, from Stage 5 and Tier 4 Final to unregulated levels.

Cummins & Isuzu Formalize Partnership
Cummins Inc. and Isuzu Motors Ltd took another step forward in their partnership by announcing a new agreement. The Isuzu Cummins Powertrain Partnership formalizes a business structure for the two companies to evaluate and carry out opportunities to jointly develop and bring new diesel and diesel-based powertrains to global markets. No financial or structural information was included in the companies’ joint announcement.

Through the new Powertrain Partnership, Isuzu and Cummins said they will share a commitment to leverage both companies’ technical strengths to develop market-leading architectures for customers around the world. The companies have committed to form an alliance board and to assign a team of dedicated individuals from each company to continue exploration of potential opportunities in product technology development, procurement and manufacturing.

Jasper Acquires Diesel USA Group
Jasper Holdings, Inc. has acquired Diesel USA Group, Inc. (Louisville, Ky). The Diesel USA Group will remain a separate company and brand as it becomes part of the Jasper ESOP. From its locations in Louisville, Ky; Cincinnati & Columbus, Ohio; Indianapolis, Ft Wayne & Crown Point, Ind.; and Fontana, Calif., Diesel USA Group is a distribution, service, and repair company servicing air and fuel products for gasoline and diesel engines in addition to other complementary products. Current leadership at Diesel USA Group will continue at the company. Diesel USA Group and Jasper will operate independently of each other as they work together as part of Jasper Holdings, Inc.
Jasper has been in the air and fuel business as part of their diesel remanufacturing process since the late 1960s. Over the past several years, Jasper has focused more on this product line and recognizes opportunities with the increased use of turbochargers on passenger cars, light trucks, and SUVs.

**Diesel Ram 1500 Relaunches for 2020**

The diesel-powered 2020 Ram 1500 will reenter the pickup wars with a third-generation 3.0L V-6 that now produces 480 lb.-ft. of torque. Ram Trucks had briefly pulled the pickup from its lineup in 2017 amid questions about its emissions testing, which have since been resolved. The 2020 Ram 1500 EcoDiesel will be able to tow up to 12,560 pounds, and the diesel engine will be offered on all trim grades, including Rebel. The Ram 1500 Classic will offer an optional second-generation 3.0L EcoDiesel. Ram is pairing the diesel engine with its eTorque mild-hybrid powertrain technologies that were introduced with the 2019 Ram 1500. The engine's torque rating marks a 14% increase from the prior model. Ram has also increased peak horsepower to 260 hp, which would be an 8% increase over the prior diesel pickup. Pricing and fuel economy ratings will be released closer to the truck's on-sale date in the fourth quarter.
The 2019 ADS International Convention & Trade Show in Orlando was a wonderful opportunity for over 400 attendees and exhibitors to network, receive industry knowledge, and Reinvest in ADS. The Convention featured relevant and informative technical training sessions, networking events, and member presentations.

The ADS Convention kicked off on Monday with 35 ADS Members participating in a golf event sponsored by BD Diesel and Goldfarb & Associates Inc. The golfers enjoyed friendly competition as well as networking opportunities throughout the morning at the Rosen Shingle Creek Golf Course.

Highly important in providing direction for the Association, the Board and Committee meetings on Tuesday morning focused on addressing issues and opportunities moving into 2020. In keeping with the 2019 theme of "Reinvest in ADS", committees are an effective way to invest in ADS and contribute to creating positive change. ADS is always looking for members to participate through serving on a committee. If you are interested in joining one of the committees listed below, contact Britanne Gasser at marketing@diesel.org:

- Business Management Committee
- Canadian General Committee
- Communications Committee
- Convention Planning Committee
- International General Committee
- Latin American General Committee
- Manufacturers Committee
- Membership Committee
- Replacement Parts Manufacturer & Distributor Committee
- Technical Education Committee
- Trade Show Committee
- Turbocharger Committee

30 Year Award
• Redat North America Inc.

General Session Welcome - Harry Rosen welcomes attendees to Rosen Shingle Creek Hotel
Tuesday's programming also included two technical training classes. Wally Mouradian of Automotive Training Group (ATG), taught the Cummins 5.9l & 6.7l Common Rail Diesel class and Michael Oliveros of Williams Diesel Service Inc. taught Diesel Exhaust Aftertreatment Explained. These training classes assisted members in staying up to date on the latest industry knowledge.

The day concluded with the Get-Acquainted Reception in the Trade Show. The reception allowed attendees and exhibitors to network and establish connections at the beginning of the week's events. Thank you to our Get-Acquainted Reception Sponsors: DieselCore, Zeki Turbo, Borg Warner, Melett Ltd., Alliant Power, Central Diesel, City Diesel, Diesel Punk Core, DISA, FPPF, and Superior Turbo & Injection.

Wednesday's session began with the Annual Business meeting along with the recognition of the outgoing board member, Sue Haven, of Oregon Fuel Injection Inc., and welcoming of a new board member, Michael Oliveros, of Williams Diesel Service Inc.
2019 ADS Convention & Trade Show Wrap Up

Service Member Panels: Warren Stewart – Business Management

Latin American Meeting - Nora Chu and Ricardo Berrueta, Board Members, and attending Latin American members.

Showtime Corner: Paul Thoms - Midwest Fuel
Keynote Speaker, Harry S. Campbell, delivered a compelling presentation on generating wildly successful business results by creating trust, respect, and caring within your team while remaining true to who you really are and what matters to you most.

Laura Rountree followed offering her remarks and announcing the partnership between ADS and Heavy Duty Aftermarket Week in January of 2020. Members received the announcement with an enthusiastic applause, and Laura continued to express excitement about the future of ADS and confidence that co-location with HDAW will significantly benefit ADS and its members. For more information regarding HDAW 2020, see page 22.

The Trade Show opened with a networking luncheon, providing attendees the opportunity to connect with colleagues and learn about the latest products and technology being presented by ADS vendors. The trade show also featured Showtime Corner, which allowed member companies to present to attendees in an informal, interactive setting.
The afternoon wrapped up with the Owners Collaboration Meeting and Forerunners Networking Event. The Owners Collaboration Meeting allowed Owners, Presidents, CEO’s, COO’s, Chairmen of the Board, and Branch Managers to discuss challenges faced by upper level management and discuss solutions. The Forerunners Networking event provided an environment for ADS Members under the age of 40 to interact with casual networking and a game of volleyball.

Thursday morning, representatives from member companies presented on their latest industry updates. Panels, like the Additives Panel, provided the group with expertise and insight, allowing for question and answer time as well.

Throughout the week, Cummins, BorgWarner, and Garrett hosted invitation-only distributor meetings. Spouses and companions enjoyed a variety of networking events including a Sangria Social and Brewery Tour.

At the conclusion of a full week of training, presentations, and networking, attendees enjoyed the Closing Reception complete with delicious food, drinks, and Dueling Pianos. The Dueling Pianos put on an entertaining show and inspired many to sing and dance along.

Mark your calendar for January 26-30, 2020 in Grapevine Texas at Heavy Duty Aftermarket Week!
ADS current and previous Presidents in attendance at this year’s event: Cam Mandel, Carl Fergueson, Ken O’Brien, Laura Rountree 31st ADS President, Laura Rountree 31st ADS President, Chuck Oliveros, and Laura’s father Harry Moore 21st ADS President.
The 2020 ADS Convention and Trade Show will be co-locating with Heavy Duty Aftermarket Week. The 2020 ADS event will be held January 26-30, 2020 at the Gaylord Texan Resort in Grapevine, Texas.

Heavy Duty Aftermarket Week (HDAW) is a week where the heavy duty aftermarket industry comes together in one place to do business. It is a partnership for an event between ADS and 11 other industry associations with the goal of bringing together the entire industry in one location - there is strength in numbers!

Each year, more than 2,300 executives and managers from the U.S., Canada, and other countries including distributors, suppliers, service providers, educators and industry media attend HDAW.

The associations remain independent and simply partner to put on an industry-wide trade show. This saves exhibitors and attendees time and money by not having to travel to multiple locations/industry events to network and learn about the newest products and technologies in the industry.

Members of ADS save significantly on exhibiting and registration - make sure your company’s membership is in good standing by October 1 to qualify for discounted member rates.

Laura Rountree, ADS President and Tim Kraus, HDAW owner representative of HDMA
You can trust Delphi Technologies. Each Delphi Technologies remanufactured injector is completely disassembled, cleaned and examined for wear and breakage. Critical and worn components are replaced to ensure reliable performance. Finally, injectors are reassembled and tested. We provide a unique trim code with applicable C7, C13 and C15 injectors for proper engine performance. With over 60 years of OE technology and expertise, our green and global solutions ensure your parts are ready for the road ahead.
IN MEMORIAM — Mark William Childress 1955–2019

Mark Childress, 63, of Cincinnati, Ohio died suddenly on Tuesday, May 14, 2019. Born in Columbus, Ohio to Eleanor (Krause) and the late John Childress, he is survived by his loving wife Sheryl (Marcum); beloved children Jason (Jill), Tara, John, and Natalie; caring sister Carol (Carey) Ball; and his baby girl Daisy Doodle (Dog).

Mark spent his entire career in the Diesel Industry, working for companies such as Diesel Injection Service of Louisville, Delphi, Flight Systems Electronics Group, Dipaco, WABCO, LKQ, Instrument Sales and Service, and D&W Diesel. Mark was known best for his continual positive outlook on life, his smile, and his sense of humor. Mark was always there to help and support his friends, customers, and business associates.

He gave it his all, he was loved by many, and he will be missed.

www.melett.com
The Association of Diesel Specialists participated in the 10th anniversary ReMaTec event in Amsterdam, The Netherlands June 23 - 25. ReMaTec is the largest remanufacturing trade event in the world, bringing the whole supply chain of remanufacturing together. David Fehling, ADS Executive Director represented ADS at the event with an exhibit booth during the 3 day show.

Niels Klarenbeek, Director Remanufacturing and Adam Hill editor ReMaTec News kicked off the event. During ReMaTec 2019 visitors were able to enjoy Keynote and Expert sessions, and the Live Demo on Augmented Reality (AR). There were side events held during the show, including the International Conference on Remanufacturing (ICoR), the Dutch Aftermarket Day and the 1st International Forum on Wind Turbine Remanufacturing, to name a few. Four out of five visitors who attended the show were international visitors, which brought the global reman industry to Amsterdam.

While visitors and exhibitors were conducting business on the show floor, the Innovation LAB was full of professionals ready to take on new insights from the industry. The ReMaTec Theatre welcomed an engaged audience, which gave way to interactive Q&As during keynotes from MAHLE, Volvo, and PwC Autofacts.

ADS Membership was well represented in the exhibit hall at this event with members such as: AP Diesel, Carbon Zapp, Diesel Core, Goldfarb & Associates, KTS Turbobillet, Mellett, Merlin, Rufree Diesel Injection, Technodiesel Murcia, Turbo Clinic, Turbo International, Wilson BBB Industries. In addition, many ADS International Members passed by the ADS booth to say hello and to get up to date on the latest information and benefits being offered at ADS.

One of the main benefits in participating at an event of this type is “the ability to meet so many individuals from companies in our industry” said David Fehling. Fehling went on to say “so many international companies participate in this show as well as attend the show, if we were not here we would never be exposed to this segment of our industry.”

New to this year's event was the high-end industry dinner at the “Royal Industrial Society Club” in Amsterdam. A total of 75 leaders in the remanufacturing industry and OEMs were invited including ADS’s David Fehling to connect with each other during a dinner at a historical location at the Dam Square facing the Royal Palace and to celebrate 10 years of ReMaTec.
FOR SALE: Bosch 515 test bench includes universal bracket, new stroke counter, excellent condition. Can demo. $6995.00 – or best offer. thoebet@dieselinjection.com or (361) 289-6666 ask for Tom.

FOR SALE: 20HP test bench includes universal bracket and (15) test adapters for Bosch, Delphi and Zexel – a $3500 value included. Test bench is direct drive. 1142 hours on the test bench. $9995.00 – or best offer. meichman@dieselinjection.com or (210) 648-4500 ask for Michael.

FOR SALE: PFD Equipment & Tools (formerly Thompson Equipment & Tools)

Pre-Show Specials Used Equipment
- Get your Bosch authorization back or add to your capacity... 2-Bosch EPS815 setup for Common Rail 1800 Bar, with all makes Piezo kits on both w/updated P.C.'s Win 7 CRS 945 2017- Completely gone over Ready to Demo “Come Test Drive Today”.

National General

EXCLUSIVE GROUP MEDICAL COVERAGE NOW AVAILABLE FOR ADS MEMBERS

We combine traditional underwriting principles with flexible health plan options to create affordable coverage for small to midsized businesses.

Composite underwritten rates are available for groups with as few as two employees enrolled in the plan with potential to receive a partial refund of paid premiums at the end of annual contract. National General provides health coverage options in 49 states and District of Columbia. Here are a few of the valuable advantages provided through this program:

• Employers decide what qualifies as full time eligibility, ranging from 20-40 hrs per week.
• This program covers 1099 contracted employees.
• Solutions available for employees working in multiple states.
• Savings over ACA rates with an opportunity for more level renewal increases
• Teledoc, COBRA, Section 125 and HSA/HRA administration are available.

• There are six medical benefit options to choose from. The number of plan choices that can be provided for your employees depends on group size.

2019 ADS Membership Directory

A copy of the membership directory has been sent to each ADS Member Company. If you or your colleagues need additional copies, please visit diesel.org/store or call 816-285-0810 to order a directory at the discounted member rate of $25/copy. The membership directory contains the most current information for member companies in good standing. Thank you to all ADS members that provided information to make this directory possible. Significant effort has been made to verify the accuracy of all listings. Please email info@diesel.org if you note any inaccuracies.
