Deliverables at a Glance

What are Deliverables?

Deliverables are what a provider must perform or provide in order to trigger payment. They identify the provider’s tasks, services and milestones, as well as due dates for completion and payment amounts.

Deliverables set the performance criteria for agreements and identify the documentation to be used for verification. They are directly related to the scope of work and are defined in Florida Statute 287.058 and 215.971.

Deliverables must be…

Quantifiable and Measurable: Services are not tangible items that can be counted and measured; therefore, they must be divided into measurable units of completed events.

Verifiable: Deliverables must be documented to provide evidence of successful completion of the performance levels.

Tasks

Each Bundle

Services can be divided into tasks which means we can pay the provider upon completion of each task. They may also be bundled together and paid upon the competition of the bundle.

Recurring

Weekly Monthly Quarterly Yearly

Services can be rendered on a recurring basis as specified above. Payments are made upon satisfactory completion of services required to be performed during a given period of time.

Projects

Milestones Phases

Services can be sectioned into milestones and phases. The provider can be paid in phases of completion or when a certain milestone is achieved.

As Needed

Per Hour or Per Client

Services can be provided on an as needed basis. Payments are made upon satisfactory completion of the services.
Scope of Work Example
