

Mead & Hunt

Water Resources Market Leader – West Coast

California (the individual can be located anywhere in California)

Mead & Hunt is looking to hire a water resources market leader for the west coast. This key member of the water resources team will be the main point of contact for existing and new projects, working with well-established water resources clients in California, bringing in new clients, and serving as a project manager. The group has a multi-year backlog on a wide range of water resources projects for public sector clients: H & H, stormwater management, flood control, water conveyance, water supply, hydro, and inundation studies.

This is a huge opportunity for a water resources engineer to take the well-established, growing west coast water resources group to the next level. Mead & Hunt boasts a vibrant office culture and offers flexibility to employees! Individuals can work from anywhere within California; please indicate location preference when applying for this position.

About the Firm:

Founded in 1900, Mead & Hunt is an employee-owned firm boasting more than 650 engineers, architects, scientists, planners and support staff in over 30 offices nationwide. Mead & Hunt has been recognized as one of the Best Firms to Work For by CE News and has been ranked 147th in Engineering News-Record's annual Top 500 Design Firms list. The Water Resources group is a well established group within Mead & Hunt and companywide employs over 45 individuals nationwide.

Requirements:

- BS in Civil Engineering or related Engineering discipline.
- 8+ years of experience.
- Licensed Professional Engineer or the ability to obtain a CA PE within 6 months.
- Established relationships with public sector water resources clients in California.
- Experience working on water resources projects (all backgrounds within water resources will be considered for this role).
