

Environmental Specialist - Generalist (Extended Deadline)

Salary

\$34.60 - \$44.19 Hourly

Closing

8/20/2018 11:59 PM Pacific

The Position

The Environmental Specialist position is a lead worker, project manager, and upper-level specialist position in the area of environmental resource science, watershed planning, and project management. Employees in this position use analytic skills and professional judgment to independently develop, evaluate and/or select environmental or natural resource science techniques, procedures and criteria; analyze data; design sampling and monitoring plans; assess watershed impacts and restoration actions, programs, and plans; and write regulatory reports. Some positions function as an expert on issues related to developing and implementing programs, plans and policies to comply with City, Regional, State and Federal regulations. The Environmental Specialist is responsible for directing the work of professional subordinates and performing and overseeing all phases of assigned projects.
