

Advanced Mohs Workshop

Beck Consulting & Associates, Inc. is holding an advanced workshop in connection with the FSDS being held at the Ritz Carlton, in Orlando, FL September 27 & 28, 2019. This training has been approved for accreditation through the National Society for Histotechnology. Avantik, has graciously offered their equipment and supplies for us to provide an advanced training session with hands on sectioning and staining.

At this training workshop, your tech will learn:

- Cell structure and tumor identification
- Techniques for correcting stain irregularities for frozen and routine Histology
- Advanced equipment and microscope maintenance to include tissue processors
- Embedding techniques for all sections, biopsies, excisions and full section for Mohs
- Hands on cutting workshop for trouble shooting on cryostat and microtome
- Special stain for immuno
- Steps for “faster turn-a-round time”

We also provide lectures on helpful tips for trouble-shooting and review your procedure manual for CLIA compliance.
