Corporate Overview

For over 30 years, the consulting engineers at HRP have worked together with our clients to assure that they reach their intended business goals and achieve the right solutions to their environmental and civil engineering challenges. HRP Associates, Inc. was founded in 1982 to serve the environmental needs of the regulated community subject to the newly-enacted Resource Conservation Recovery Act (RCRA). Today, HRP is a multidisciplinary environmental and engineering consulting firm. We have completed projects in nearly every state. Not only do we provide critical services to clients throughout the U.S., we have also extended our Global Consulting Services to over twenty countries throughout the Americas, Europe, and Asia. At HRP, as part of our continuous improvement policy, we constantly strive for and achieve new and better methods to lead your projects to successful completion. Our engineering consultants do this by listening carefully to your concerns, by innovating new ideas and processes internally, and by implementing solutions that are flexible, effective, and sustainable. Our collaborative business approach means you will always be fully involved and informed through the development and completion of your project. We are sure that you, like our current clients, will find that this partnership approach provides your company with the unsurpassed level of service and integrity that you expect. Our service areas include:
