**West Maui Medical Sites**
Current Drinking Water Status

- 426 Water Samples Taken in Kula and Lahaina
- Some detections of benzene but all below the MCL
- 70% of Upper Kula has been removed (zone 1) from the Kula advisory. Other zones in the Kula water system will be amended incrementally in the next month.
- Lahaina Leialii village is anticipated to be the next zone to be amended with the homes below the bypass highway in Kelawea
- Will continue by zone as can demonstrate safety
### MAUI WILDFIRE DISASTER RESPONSE

**Consolidated Debris Removal Program**

*Cultural Monitors Will Be On-Site During This Process*

Wildfire Disaster Response Phases
Phase 1: Hazardous Materials Removal

Visiting your property?
Pass Issuance
(health safety guidance and expectation setting)

The MDHO will be addressing visitors at the center about physical health (PPE, decontamination, and dust control) and mental health (surveys including a basic mental health assessment).
Simple Guidance

Going back will be a very unsettling experience. Expect that you’ll have big feelings. Be kind to yourself and others. It would be good to have someone with you.

The ash in the dust is very bad for you. Don’t breath it or get it on you. Use PPE.

It’s very, very hot and heat exhaustion, especially with PPE, is a real risk. Don’t stay long.

There will be help in the reentry zones. Use them.
1. How are Lahaina doctors doing? Are they feeling overwhelmed? Are they able to reconnect with their patients? How can we avoid burnout of Maui doctors?

2. What are the plans to support Maui doctors and their patients with care coordination, admin support (prior authorization), clinical navigators, dieticians, pharmacy, etc?

3. Does telehealth have a role in supporting Maui doctors remotely, and assist with consultations, referrals?

4. There will likely be many QUEST patients who need help. Does Maui FQHC have this capacity? Will they expand?
Well-being Session (10-minute talks) - Topics and Schedule:

1. The Power of Gratitude
   - **Date:** Thursday, September 21, 2023
   - **Location:** MMMC Auditorium
   - **Time:** 12:00 PM and 5:00 PM [Every 15 minutes between 1-2 PM and 5-6 PM]

2. Living with Grief and Loss
   - **Date:** Tuesday, September 26, 2023
   - **Location:** MMMC Auditorium
   - **Time:** 1:00 PM and 5:00 PM [Every 15 minutes between 1-2 PM and 5-6 PM]
Mahalo HMA for your participation.
What to do when re-entering an area impacted by wildfire

EXERCISE CAUTION!
Beware of Major Hazards
- Fire damage can create significant health and safety hazards for you and your loved ones including:
  - Toxic airborne particle inhalation
  - Injury from unstable structures
  - Hazardous materials (ash, asbestos, lead paint, heavy metals, oils, pesticides, etc.)
  - Broken pipes, exposed nails, broken glass, and damaged structural elements
  - Explosive hazards such as propane tanks and solvents

SAFETY TIPS
- STAY AWAY FROM YOUR HOME OR BUSINESS UNTIL OFFICIALS TELL YOU IT IS SAFE TO RETURN.
- USE EXTREME CAUTION WHEN RE-ENTERING A BURNED AREA. Avoid charred trees, power poles, and other structures that may have lost stability during the fire.
- SECURE THE HELP OF PROFESSIONAL HAZARDOUS MATERIAL CLEANUP/RESTORATION SERVICES. Refrain from sorting through belongings or cleaning fire debris for health reasons. Ash can make you ill.
- WEAR STURDY SHOES, A RESPIRATOR, AND PROTECTIVE GEAR. If exposure to ash cannot be avoided, including long pants and shirt, gloves, and NIOSH-certified N-95 respirator mask.
- DO NOT EAT, DRINK, OR BREATHE IN ANYTHING THAT HAS BEEN NEAR THE FLAMES. Smoke, or ash. Food in cans, jars, refrigerators, and freezers may appear to be okay but it could contain dangerous bacteria if exposed to heat or be compromised by toxic fumes and chemicals.
- INSPECT PROPANE TANKS FOR VISIBLE DAMAGE before turning them on.
- DO NOT USE YOUR WATER to wash dishes, brush your teeth, wash and prepare food, wash your hands, make ice, or baby formula until you have been cleared by officials to do so.
- CHILDREN AND PETS SHOULD NOT BE IN THE VICINITY while cleanup is in progress. Even if care is exercised, it is easy to stir up ash that may contain hazardous substances.
- DOCUMENT AND INVENTORY ALL DAMAGES.
