2021 Water Summit – January 20, 2021

Agenda Highlights

Join AIC for our 5th Annual 2021 Water Summit, provided to you on-line from the comforts of your home or office!

The Summit will include nine (9) pre-recorded technical sessions on a wide variety of topics such as:

- Supporting Citizen Engagement for River Restoration through Crayfish Collection and Testing for Mercury
- How Wastewater Treatment Plants Support the Circular Economy
- Emerging Data and Regulation of PFAS/PFOA in Idaho and Nationally
- Idaho Covid-19 Wastewater Monitoring and Response
- Emergency Planning
- Capital Program Development and Delivery
- Integrated Planning
- Stibnite Mine Reclamation
- Using Probabilistic Models for Evaluation IPDES Treatment Limits

Also featured will be legislative and water regulation updates on IPDES permitting and guidance development, Idaho surface water quality criteria, current and emerging Idaho water rights issues, and other water-related topics queued up for the 2021 Idaho legislation session.

The afternoon live session features MaryAnna Peavey on federal and state infrastructure funding resources, and Fred Andes on the evolving federal v. state jurisdiction framework, water-related transition issues for the new administration, and an update to the ongoing litigation on Montana’s numeric nutrient water quality standards.

In preparation for our afternoon live session, AIC is encouraging our Summit attendees to view the recent “Funding Agency Training for Water & Wastewater Projects:"
