Subscription Fees for Corporate Members

The IFU membership is based on the Articles of Association and yearly subscription fees contained therein. When you become a member, you subscribe automatically to various benefits, of which the most valuable one – from a financial perspective – is the possibility to use the IFU methods for a certain amount of employees.

Other benefits include access to literature, the possibility to work in the IFU commissions, networking with IFU experts, discounts for events, suppliers and services, etc.

There are four categories of membership for Corporate Members:

All categories will be explained in details after this graphic, which should give you a first overview:

Category Type	I	II	III	IV
