WELCOME MESSAGE

IMAPS/Global Electronics Association Onshoring Advanced Packaging and Assembly Workshop

Hosted by IMAPS and Global Electronics Association, the Onshoring Advanced Packaging Workshop brings together the U.S. Government, DIB (Defense Industrial Base), and key stakeholders to drive microelectronics packaging and assembly onshoring. Discover emerging government-led advanced packaging initiatives and collaborate with suppliers, researchers, and integrators to strengthen the Advanced Packaging Supply-Chain Onshoring ecosystem in America. The mission of this workshop is to engage our workforce community to identify the newly created Advanced Packaging programs which address US Government and Defense requirements critical to the onshoring of the microelectronic assembly and packaging supply chain. Government agencies including the Department of Commerce/NIST, DoD (SHIP/IBAS/Title III), and DARPA will be briefing on their advanced packaging programs.

ALL attendees for the Workshop MUST be U.S. Citizens with a current and valid U.S. passport.
