Section 1
Human Performance Technology concepts and standards

Contents

1 Introduction .................................................. 10
2 Definition and overview of Human Performance Technology ........................................... 12
2.1 Holistic view .................................................. 16
2.2 Quantifiable inhibitors ......................................... 16
2.3 Performance should be achievable ......................... 17
2.4 Systems components .......................................... 17
2.5 Foundation of performance ................................. 18
2.6 Alignment of performance ................................. 18
2.7 Structured approach ........................................... 18
3 Standards of performance consulting ......................... 22
3.1 Overview of the ten international standards for PI ......................................................... 22
3.2 Principle standards ........................................... 23
3.2.1 Performance standard 1: Focus on outcomes or results ............................................... 23
3.2.2 Performance standard 2: Take a systemic view ......................................................... 24
3.2.3 Performance standard 3: Add value .......................................................... 25
3.2.4 Performance standard 4: Work in partnerships with clients and professionals ...... 25
3.3 Process standards ........................................... 26
3.3.1 Performance standard 5: Determine need and opportunity analysis ............................... 26
3.3.2 Performance standard 6: Determine cause .......................................................... 31
3.3.3 Performance standard 7: Design solutions including implementation and evaluation .......................... 33
3.3.4 Performance standard 8: Ensure solutions’ conformity and feasibility ............................. 35
3.3.5 Performance standard 9: Implement solutions .......................................................... 36
3.3.6 Performance standard 10: Evaluate results and impact ................................................ 37
4 Conclusion ..................................................... 40
5 Self-assessment questions ....................................... 43
6 Self-assessment checklist ....................................... 45
7 Additional reading .............................................. 47
8 References ....................................................... 50
9 Internet resources/websites you may want to consult ......................................................... 51
Section 2
Human Performance Technology landscape, roles and competencies

Contents

1 Introduction 56
2 Performance and work landscape 57
2.1 System(s) view 58
2.2 Systematic approach 61
3 Process standards applied as Human Performance Technology Methodology 63
3.1 The methodology explained 63
3.2 The methodology applied 64
4 Roles and competencies of the Human Performance Technology consultant 68
4.1 The role of the Human Performance Technology consultant 68
4.2 Ten guidelines for success as a Human Performance Technology consultant 71
4.3 Mistakes to avoid as a Human Performance Technology consultant 74
4.4 The competencies and behaviors in the Human Performance Technology consultancy framework 75
5 Application of Human Performance Technology in managing performance 81
6 Case study 92
7 Conclusion 95
8 Self-assessment questions 96
9 Answers to the case study questions 98
10 Self-assessment checklists 99
11 Additional reading 100
12 References 103
13 Internet resources/websites you may want to consult 104
