

Albert Sweets

President, Innovative STEM Solutions, LLC
2013 BEYA Special Recognition Honoree

Albert Sweets leads an organization that seeks to bring opportunities to urban children and adults, as well as excite them about the prospect of working in science, technology engineering and math (STEM). Innovative STEM Solutions (iSTEMS) has sponsored the Ruth Golberg Design Camp, a summer communication and technology program for middle and high school students held at Arizona State University and his Alma mater, Morgan State University. He also supports several extracurricular programs in the Baltimore area, and has been a mentor for K-12 school systems in Maryland, North Carolina and Pennsylvania. In 1984, Sweets enlisted in the U.S. Navy, eventually switching over to the Naval Reserves, where he remained until 2005. He earned a bachelor's degree in electrical engineering from Morgan State University in 1994. Five years later, he achieved his master's in project management from George Washington University.
