

Ecaterina Gulie RN, MS, PhD (Doctoral Student), President of RNA

I graduated from Nursing at the University from Sibiu, Romania. I have done MS, and now I am a student to the doctoral program. I worked as a nurse in the big hospital from the town Craiova -28 years in the general surgery (four years as a chief nurse), and in present time I work as a nurse to the Department of Physical Medicine and Medical Rehabilitation.

From 2007 till now I am president of the Romanian Nursing Association. Because RNA is affiliated to several international organizations, I am the delegated member to the ICN, EFN, and EFNMA. I also did an intense activity of Lobby for the development of our profession to international level.

I'm editor of the magazine "NURSING" (journal of the RNA), and together some colleagues have developed many programs, projects, conferences and published many books, materials for nursing.

I was involved in the project "Introducing innovative strategy for bridging cancer care in Romania" as a manager assistant, as a lecturer, and and I want to continue with my colleagues to develop other projects in cancer nursing.
