

### **Marta FÉNYES MD**

Graduated as a medical doctor at the Semmelweis Medical University Budapest. She made her first specialization in pulmonology at the Pulmonological Department of Semmelweis University and later the second specialisation in internal medicine. She was working as pulmonologist and later as internist for 17 years in clinical inpatient setting in Budapest.

After a big change she was working 12 years as medical advisor and medical lead in the pharmaceutical industry in the field cardiovascular, lipidology and pulmonology at different innovative companies (Boehringer/ROCHE, Pfizer).

She made her third specialisation also in psychotherapy from Semmelweis University. As medical lead she was working hard in smoking cessation projects also by Pfizer and organised interdisciplinary advisory board meetings to enhance medical and government interest in better tobacco control.

Currently she is working as pulmonologist in outpatient clinics and practice also cognitive psychotherapy. She has special education in smoking cessation counselling and is working for Methodological Center SC in Budapest.
