"Global Challenges and Sustainability in the Asia Pacific: The Role of the Third Sector"

Jakarta, 4-5 December 2017

Pullman Hotel Central Park, Hosted by CECT Trisakti University

The third sector is a well-established, diverse and growing component of most Asian and Pacific societies. Specifically, third sector organisations in some countries are forced to change their funding sources from purely donation-reliant to become more independent by undertaking social enterprise activities that generate income. Third Sector organisations are also required to act more professionally. This enables them to collaborate with the private sector so that this becomes an alternate source of funding, for example, through Corporate Social Responsibility (CSR) funding.

Research in the fields of third sector, social enterprise and CSR is ever expanding, particularly in countries that have undergone substantial transformations in their economies and governance. However, there are constant, often overwhelming, global challenges that confront the operation and success of the third sector in the contemporary world.

This conference is an opportunity to showcase exciting new practice developments and research that seek to establish sustainable roles and cope with global challenges for third sector organizations in the many diverse countries that make up the region. We are very keen to see a wide range of papers that encompass applied research, practice research and theoretical advances and explorations in all aspects of this dynamic field.
