Anthony Collins

Cisco Principal Consultant

Developing yourself as a change leader—how to build a strong foundation of skills grounded in evidence-based practice

Anthony helps businesses make big moves in response to new industry dynamics, often through enterprise-wide strategic-transformation programs. He brings insights from a wide repertoire of industry settings, having completed more than 100 engagements with 45 client organisations in 16 sectors.

He works with global clients to develop strategic blueprints, transformation roadmaps and change strategies that help organisations face the new future of technology including automation, data and analytics and cloud. Prior to joining Cisco, Anthony held senior advisory and management roles around the globe.

Anthony has several awards for intensely focusing on customer's needs and holds an MBA from AGSM and a Masters in Coaching Psychology from Sydney University. He also holds professional certifications and affiliations with relevant industry organisations, notably, Change Management Institute and Harvard Institute of Coaching.

Nevine Iskandar & Marcel Foederer

E2E ITSM Consulting / DevOps Agile Skills Assoc

Leadership in the Digital Age

As a Service and Project Management trainer, consultant, and line manager with over twenty-five years of experience in IT, Marcel has carried out strategic and tactical assignments in many different areas. His experience includes project and program management, product management, requirements analysis, and delivery of training related to international IT best practices in IT Service Management, Project management, DevOps, and advanced troubleshooting techniques, both in the private and public sector on a global basis.

Recently worked as a Lead Architect team member and author in the development of ITIL 4 Foundation and author of the ITIL 4 Strategist module Direct, Plan and Improve. He was also involved in the development and maintenance of different DASA courses, like the DevOps Fundamentals, DASA Professional DevOps Enable & Scale, DASA Professional Specify & Verify, and the DASA DevOps Leader.
