Now offering

TELEMEDICINE APPOINTMENTS

We are excited to announce our new telemedicine platform! Telemedicine is a secure HIPAA compliant way to have a face to face visit with your doctor from the safety of your home.

You simply use your smartphone or computer to connect with us in real-time. It is simple to navigate, and has been highly successful in getting you in touch with your provider in these unprecedented times.

The following is a small list of appointments that may be appropriate to perform remotely:

- Family planning/sterilization
- Birth control
- Hormone replacement therapy
- Preconception counseling
- Infertility
- PCOS
- Heavy or irregular menstrual cycles
- Painful periods
- Endometriosis consult
- PMS/PMDD
- Medication follow up
- Menopause

Call today to see if a televisit is right for you!
